## The Car Hacker's Handbook

### A Guide for the Penetration Tester

No Starch Press Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

## Drawing Futures

### Speculations in Contemporary Drawing for Art and Architecture

UCL Press Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

## Supply Chain Management

### Strategy, Planning, and Operation

'Supply Chain Management' illustrates the key drivers of good supply chain management in order to help students understand what creates a competitive advantage. It also provides strong coverage of analytic skills so that students can gauge the effectiveness of the techniques described.

## Operations Strategy

**Pearson Education** This new book provides a comprehensive and refreshing insight into the more advanced topic of operations strategy. It builds on concepts from strategic management, operations management, marketing, and human resources. A three-part organization covers the nature, content, and process of operations strategy. For practicing managers.

## Product Strategy and Management

**Pearson Education** The long-awaited second edition of Baker and Hart's "Product Strategy and Management" expertly analyses the nature of product strategy and the management of the entire product life cycle, from new product development to product elimination. The nature and practice of the life cycle are central to the firm's overall strategy for competitiveness. The authors repeatedly emphasize the fact that without product strategy and management there would be no markets, no customers, no competition - and therefore no marketing. Exploring the fundamental relationship between the success of a product and the survival of the firm, the book employs an innovative four-part structure: Part 1 - The theoretical foundations Part 2 - New product development Part 3 - Product management Part 4 - Product elimination Whether studying at undergraduate, postgraduate or MBA levels, students will find this book essential to their understanding of this increasingly important subject area. Michael Baker is Emeritus Professor of Marketing at the University of Strathclyde where he founded the Department of Marketing in 1971. Past Chairman of the Chartered Institute of Marketing and founder of its Academic Senate, he was Chair of the Marketing Education Group for 16 years and President of its successor, the Academy of Marketing, for 18 years. Susan Hart is Professor of Marketing at Strathclyde University. She has held professorial appointments at Heriot-Watt and Stirling University and visiting positions in the USA, Australia and Europe. She has published numerous articles on the subject of product deletion, new product development and new product launch.
