Church and Manor A Study in English Economic History (Classic Reprint) Excerpt from Church and Manor: A Study in English Economic History Of late years various books relating to the unit of English territorial organisation known as the manor have appeared. Two or three of these deal with short periods, such as the eleventh or the thirteenth century, and the late Mr. Seebohm, in a masterly investigation, has surveyed a considerable part of the field. Notwithstanding the good work that has been done, an essential part of the subject has been omitted, or misunderstood. The manor and the ecclesiastical benefice have been regarded as entirely independent things. But the economic history of mediaeval England will gain much in simplicity if it can be shown that lord and priest were once the same person; that the hall cannot at an early time be distinguished from the church; and that ecclesiastical benefices were themselves manors, with all the privileges which belonged to feudal lordship. No treatment of the economic history of these islands can be satisfactory unless it includes the church-building and the benefice within its scope. To describe the scattered acres of the open fields, with all the complicated belongings of the village community, and yet leave out the building near which the frail and mud-built houses of the inhabitants were gathered, is to omit the chief point of interest, for the church was not only the place of worship but also the seat of local government. It has been thought desirable to treat the evidence from architecture, as found in existing remains or referred to in documents, in considerable detail, because, if it can be proved that the church-fabric was evolved from the hall or lord's dwelling, a strong presumption arises, on that ground alone, that the benefice was the manor. Theology and the Soul of the Liberal State Rowman & Littlefield Conventional wisdom suggests that theology is necessarily unfriendly to the liberal state, but neither philosophical analysis nor empirical argument has convincingly established that conclusion. Examining the problem from a variety of perspectives, including law, philosophy, history, political theory, and religious studies, the essays in Theology and the Soul of the Liberal State suggest the possibilities for and limits on what theological reflection might contribute to liberal polities across the globe. how these changed. The impact of the Conquest of England by the Normans is the central focus of the book, which not only assesses the destruction and upheaval caused by the invading forces, but also examines how the Normans contributed to local culture, religion, and society. The volume explores a range of topics including food culture, funerary practices, the development of castles and their impact, and how both urban and rural life evolved during the 11th century. Through its nuanced approach to the complex relationships and regional identities which characterised the period, this collection stimulates renewed debate and challenges some of the long-standing myths surrounding the Conquest. Presenting new discoveries and fresh ideas in a readable style with numerous illustrations, this interdisciplinary book is an invaluable resource for those interested in the archaeology, history, geography, art, and literature of the 11th century.

Love, Hate, and the Law in Tudor England The Three Wives of Ralph Rishton Oxford University Press Love, Hate, and the Law in Tudor England reconstructs the life of Ralph Rishton, a member of the sixteenth-century Lancashire gentry who was a child bridegroom and a serial wife-discarder, who bribed church officials to obtain a forged annulment, defrauded a kinsman out of his inheritance, and adroitly manipulated his own and other people's land. The dozens of lawsuits in which the Rishtons were involved, in many different courts, elucidate one family's engagement with law in Tudor England: how they used and misused law, how it shaped their perceptions of rights and mutual obligations, and how it framed litigants' and witnesses' language. Drawing upon trial and estate records, the core of this study is the central narrative of Ralph Rishton's three wives, of litigiousness and violence, marriage and property, and the pursuit of equitable resolutions to disputes, along with countless smaller narratives that vividly capture a culture in its time and place. Alongside that central narrative, L. R. Poos uses the Rishton stories as a starting-point to analyse child marriage, the construction of memory, and the development of local historical identity through antiquarians and the Victorian and Edwardian local press, demonstrating how - from the time of the Rishtons into the twentieth century - historical narratives were continually reshaped and repurposed.

Julian's Gospel Illuminating the Life and Revelations of Julian of Norwich Orbis Books This fascinating study of the life and work of Julian of Norwich, the 14th century English mystic, whose "Revelations" is among the most popular and influential works of Christian mysticism, is the first book to combine an historical reconstruction of Julian's life in 14th century Norwich with a comprehensive commentary on her Revelations in a new and faithful translation from the Middle English. Unlike other brief summaries of Julian's life and times, this book goes in-depth to uncover the political, cultural, social, and religious milieu that formed and deeply influenced her development as a woman and a mystic. Additionally, unlike other textual companions to Julian's work that provide only short explanations of Middle English words, or merely footnote theological terms, this work gives the reader a detailed analysis of her writings, illuminating her ground-breaking mystical theology with extensive scholarship. Throughout, the book creates a strong dramatic arc for Julian's Revelations that interweaves her personal sufferings and burning questions with her visionary experiences, producing a compelling spiritual biography.

Body and Sacred Place in Medieval Europe, 1100-1389 Routledge Body and Sacred Place in Medieval Europe investigates the medieval understanding of sacred place, arguing for the centrality of bodies and bodily metaphors to the establishment, function, use, and power of medieval churches. Questioning the traditional division of sacred and profane jurisdictions, this book identifies the need to consider non-devotional uses of churches in the Middle Ages.

Dawn Marie Hayes examines idealized visions of medieval sacred places in contrast with the mundane and profane uses of these buildings. She argues that by the later Middle Ages-as loyalties were torn by emerging political, economic, and social groups-the Church suffered a loss of security that was reflected in the uses of sacred spaces, which became more restricted as identities shifted and Europeans ordered the ambiguity of the medieval world.

Meaning and Moral Order Explorations in Cultural Analysis Univ of California Press Meaning and Moral Order goes beyond classical, neoclassical, and poststructural theories of culture in its attempt to move away from problems of meaning to a more objective concept of culture. Innovative, controversial, challenging, it will compel scholars to rethink many of the assumptions on which the study of ideology, ritual, religion, science, and culture have been based.

Punishing the dead? Suicide, Lordship, and Community in Britain, 1500-1830 OUP Oxford What can we learn from suicide, that most personal and often inscrutable of acts? This strikingly original work shows how, from treatment of suicides in historic Britain, unique insights can be gained into the development of both social and political relationships and cultural attitudes in a period of profound change. Drawing ideas from a range of disciplines including law, philosophy, the social sciences, and literary studies as well as history, the book comprehensively analyses how successful and attempted suicide was viewed by the living and how they dealt with its aftermath, using a wide variety of legal, fiscal, and literary sources. By investigating the distinctive institutional environments and mental worlds of early modern England and Scotland, it explains why suicide was treated as a crime subject to financial and corporal punishments, and it questions modern assumptions about the apparent 'enlightenment' of attitudes in the eighteenth century. The book is divided into two parts. Part one examines the role of lordship in managing social and economic relationships following suicide and illuminates the importance of distinctive punishments inflicted on suicides' bodies for understanding historic communities. The second part of the book places suicide in its cultural context, analysing the attitudes of early modern people to those who killed themselves. It explores religious beliefs and the place of the devil as well as secular and medical understandings of suicide's causes in sources that include provincial newspapers. Informed by continental as well as British research, Punishing the Dead? explicitly compares England and Scotland, making this a completely British history. It also offers intriguing evidence for the importance of cultural regions and local vernaculars that transcend national boundaries.

Nigel Saul uses lordly engagement with the parish church as a way of opening up the piety and sociability of the gentry, focusing on the gentry as founders and builders of churches, worshippers in them, holders of church advowsons, and patrons and sponsors of parish communities. Saul also looks at how the gentry's interest in the parish church sat alongside their patronage of the monks and friars, and their use of private chapels in their manor houses. Lordship and Faith seeks to weave together themes in social, religious, and architectural history, examining in all its richness a subject that has hitherto been considered only in journal articles. Written in an accessible way, this volume makes a significant contribution not only to the history of the English gentry but also to the history of the rural parish church, an institution now in the forefront of medieval historical studies" -- Albany Law Journal **British Economic and Social History A Bibliographical Guide** Manchester University Press **Tudor Political Culture** Cambridge University Press An original collection of essays on the ideas, images, and rituals of Tudor political society. **Church and Manor A Study in English Economic History** Harvard Law Review The Harvard Law Review is a student-run journal of legal scholarship.
