COST ACCOUNTING

PLANNING AND CONTROL

MANAGEMENT AND COST ACCOUNTING

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of todays student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

HANDBOOK OF AFRICAN MEDICINAL PLANTS, SECOND EDITION

CRC Press With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

APPLICATIONS OF ARTIFICIAL INTELLIGENCE IN BUSINESS, EDUCATION AND HEALTHCARE

Springer Nature This book focuses on the implementation of Artificial Intelligence in Business, Education and Healthcare, It includes research articles and expository papers on the applications of Artificial Intelligence on Decision Making, Entrepreneurship, Social Media, Healthcare, Education, Public Sector, FinTech, and RegTech. It also discusses the role of Artificial Intelligence in the current COVID-19 pandemic, in the health sector, education, and others. It also discusses the impact of Artificial Intelligence on decision-making in vital sectors of the economy.

THE BENEFITS OF PLANT EXTRACTS FOR HUMAN HEALTH

MDPI Nature has always been, and still is, a source of food and ingredients that are beneficial to human health. Nowadays, plant extracts are increasingly becoming important additives in the food industry due to their antimicrobial and antioxidant activities that delay the development of off-flavors and improve the shelf life and color stability of food products. Due to their natural origin, they are excellent candidates to replace synthetic compounds, which are generally considered to have toxicological and carcinogenic effects. The efficient extraction of these compounds from their natural sources and the determination of their activity in commercialized products have been great challenges for researchers and food chain contributors to develop products with positive effects on human health. The objective of this Special Issue is to highlight the existing evidence regarding the various potential benefits of the consumption of plant extracts and plant-extract-based products, with emphasis on in vivo works and epidemiological studies, the application of plant extracts to improving shelf life, the nutritional and health-related properties of foods, and the extraction techniques that can be used to obtain bioactive compounds from plant extracts.

COST AND MANAGEMENT ACCOUNTING

COST ACCOUNTING

Dame Publications Horngren's "Cost Accounting" defined the cost accounting market and continues to innovate today by consistently integrating the most current practice and theory. This acclaimed, number one market-leading book embraces the basic theme of " different costs for different purposes." It reaches beyond cost accounting procedures to consider concepts, analyses, and management. This latest edition of "Cost Accounting "incorporates the latest research and most up-to-date thinking into all relevant chapters. Professional issues related to Management Accounting and Management Accountants are emphasized. Chapter topics cover the accountant' s role in the organization to performance measurement, compensation, and multinational considerations. For future accountants who want to enhance their understanding of-and ability to-solve cost accounting problems.

IMPROVING MATERNAL AND REPRODUCTIVE HEALTH IN SOUTH ASIA

DRIVERS AND ENABLERS

World Bank Publications South Asia Region (SAR) has decreased maternal mortality ratio (MMR) by 65 percent between 1990 and 2013, which was the greatest progress among all world regions. Such achievement implores the question, What made SAR stand out against what is predicted by standard socioeconomic outcomes? *Improving Maternal and Reproductive Health in South Asia: Drivers and Enablers* identifies the interventions and factors that contributed to reducing MMR and improving maternal and reproductive health (MRH) outcomes in SAR. In this study, the analytical framework assumes that improving MRH outcomes is influenced by a multitude of forces from within and outside the health system and considers factors at the household and community levels, as well as interventions in other sectors and factors in the enabling environment. The analysis is based on a structured literature review of the interventions in SAR countries, relevant international experience, and review of the best available evidence from systematic reviews. The focus of the analysis is mainly on assessing the effectiveness of interventions. The findings from this study indicate that the most effective interventions that prevent maternal mortality are those that address the intra-partum stage - the point where most maternal deaths occur - and include improving skilled birth attendance coverage, increasing institutional delivery rates, and scaling up access to emergency obstetric care. There is also adequate evidence that investing in family planning to increase contraceptive use also played a key role during the inter-partum phase by preventing unwanted pregnancies and thus averting the risk of maternal mortality in SAR countries. Outside the programmatic interventions, the levels of household income, women's education, and completion of secondary education of girls were also strongly correlated with improved MRH outcomes. Also, there is strong evidence that health financing schemes - both demand and supply side - and conditional cash transfer programs were effective in increasing the uptake of MRH services. The study points out to many other interventions with different degrees of effectiveness. The study also identified four major reasons for why SAR achieved this progress in MMR reduction. The best practices and evidence of what works synthesized in this study provide an important way forward for low- and middle-income countries toward achieving the health-related Sustainable Development Goals.

There were organized in topical sections named: Image Processing, Pattern Analysis and Machine Vision; Information and Data Convergence; Disruptive Technologies for Future; E-Governance and Smart World

TRANSNATIONAL LEGAL ACTIVISM IN GLOBAL VALUE CHAINS

THE ALI ENTERPRISES FACTORY FIRE AND THE STRUGGLE FOR JUSTICE

Springer Nature This open access book documents and analyses the various interventions - legal, political, and even artistic - that followed the Ali Enterprises factory fire in Karachi, Pakistan, in 2012. It illuminates the different substantive and procedural aspects of the legal proceedings and negotiations between the various local and transnational actors implicated in the Ali Enterprises fire, as well as the legal and policy reforms sparked by the incident. This endeavour serves to embed these legal cases and reform efforts in the larger context of human and labour rights protection and global value chain governance. It also offers a concrete case study relevant for ongoing debates around the role of transnational approaches in making human rights litigation, advocacy, and law reform more effective. In this regard, the book interrogates and critically reflects on such legal campaigns and local and transnational reform work with a view to future transformative legal and social activism.

THE PAKISTAN NATIONAL BIBLIOGRAPHY

QUANTILE REGRESSION

Cambridge University Press Quantile regression is gradually emerging as a unified statistical methodology for estimating models of conditional quantile functions. By complementing the exclusive focus of classical least squares regression on the conditional mean, quantile regression offers a systematic strategy for examining how covariates influence the location, scale and shape of the entire response distribution. This monograph is the first comprehensive treatment of the subject, encompassing models that are linear and nonlinear, parametric and nonparametric. The author has devoted more than 25 years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. The treatment will find its core audiences in econometrics, statistics, and applied mathematics in addition to the disciplines cited above.

ENCYCLOPEDIA OF MULTICULTURAL EDUCATION

Greenwood Publishing Group In the study of multicultural education, there are key names, places, concepts, and legal actions which provide a foundation for the field. This reference includes more than 400 entries from a broad range of topics related to multicultural education. While many of the entries are for terms and theories related to multicultural education, the volume also provides entries for notable persons from different cultures and relates them to the curriculum. In addition, the book includes entries for particular cultural groups, which examine their educational experiences and needs. Each entry not only helps to identify and place in an historical perspective a particular term, but also links that term to an important aspect of multicultural education. Entries provide bibliographic information, and the volume concludes with a selected, general bibliography.

HANDBOOK OF CRIMINAL INVESTIGATION

Routledge This book provides the most comprehensive and authoritative book yet published on the subject of criminal investigation, a rapidly developing area within the police and other law enforcement agencies, and an important sub discipline within police studies. The subject is rarely out of the headlines, and there is widespread media interest in criminal investigation. Within the police rapid strides are being made in the direction of professionalizing the criminal investigation process, and it has been a particular focus as a means of improving police performance. A number of important reports have been published in the last few years, highlighting the importance of the criminal investigation process not only to the work of the police but to public confidence in this. Each of these reports has identified shortcomings in the way criminal investigations have been conducted, and has made recommendations for improvement. The Handbook of Criminal Investigation provides a rigorous and critical approach to not only the process of criminal investigation, but also the context in which this takes place, the theory underlying it, and the variety of factors which influence approaches to it. It will be an indispensable source of reference for anybody with an interest in, and needing to know about, criminal investigation. Contributors to the book are drawn from both practitioners in the field and academics.

HANDBOOK OF COST MANAGEMENT

John Wiley & Sons Handbook of Cost Management, Second Edition covers all of the essential topics in cost management and accounting. It includes conventional topics, such as job costing and cost allocation, as well as such current topics as balanced scorecard, economic value added, logistics and marketing cost, theory of constraints, inter-organizational costing, and the cost of quality.

INTERMEDIATE ACCOUNTING

IFRS EDITION

Wiley Global Education Intermediate Accounting: IFRS Edition provides the tools global accounting students need to understand IFRS and how it is applied in practice. The emphasis on fair value, the proper accounting for financial instruments, and the new developments related to leasing, revenue recognition, and financial statement presentation are examined in light of current practice. Global Accounting Insights highlight the important differences that remain between IFRS and U.S. GAAP, and discuss the ongoing joint convergence efforts to resolve them. Comprehensive, up-to-date, and accurate, Intermediate Accounting: IFRS Edition includes proven pedagogical tools, designed to help students learn more effectively and to answer the changing needs of this course.

BORANES IN ORGANIC CHEMISTRY

Cornell University Press The leading researcher in the uses of boranes in organic synthesis here reviews his work over the past thirty-five years, covering such areas as steric strains, the nonclassical ion problem, selective reductions, hydroboration, and the organoboranes as synthetic intermediates. But more than an exposition of enormous accomplishment, the book is a scientific autobiography that will provide chemists with historical perspective on their profession. The author's detailed narrative of his own research experiences not only adds to the understanding of the present state of the study of boranes, but will serve as a stimulus to imaginative research in the future.

TOXICOLOGICAL ASPECTS OF DRUG-FACILITATED CRIMES

Elsevier Toxicological Aspects of Drug-Facilitated Crimes provides readers with an overview of the field of DFC: its history, toxicological effects, analysis, interpretation of results, the roles that age, gender and race may play, and clinical presentations of these drugs. The most commonly used drugs in DFC are addressed (alcohol, cannabis, MDMA, and cocaine), as well as an emerging range of pharmaceuticals (benzodiazepines, hypnotics, sedatives, neuroleptics, histamine H1-antagonists, or anesthetics), which are becoming more widely used, but are more difficult to detect. Edited by a world-renowned expert in the field of Forensic and Analytical Toxicology, Pascal Kintz, this book investigates toxicants of emerging concern and brings together a number of experts in the field to address the most recent discoveries on DFC toxicology. Brings together the latest research on the toxicological analysis of drug-facilitated crimes (DFC), with real-life case studies Provides up-to-date analytical techniques for determining toxicity levels in blood, urine, and hair Covers all types of toxicants involved in DFC, including alcohol, cannabis, MDMA, and a wide variety of pharmaceuticals

THE STATE OF KNOWLEDGE ON MEDICAL ASSISTANCE IN DYING FOR MATURE MINORS

Council of Canadian Academies In December 2016, the CCA was asked by then Minister of Health Jane Philpott and Minister of Justice and Attorney General of Canada Jody Wilson-Raybould to undertake independent reviews related to medical assistance in dying (MAID). Specifically, the CCA was tasked with examining three particularly complex types of requests for MAID that were identified for further review and study in the legislation passed by Parliament in 2016: requests by mature minors, advance requests, and requests where a mental disorder is the sole underlying medical condition. On December 12, 2018 the CCA released the three final reports of the Expert Panel, one on each type of request: The State of Knowledge on Medical Assistance in Dying for Mature Minors; The State of Knowledge on Advance Requests for Medical Assistance in Dying; and The State of Knowledge on Medical Assistance in Dying Where a Mental Disorder is the Sole Underlying Medical Condition.
