Field Guide to Photographic Science This Field Guide provides a concise summary of the photographic imaging chain and explains the connections between the science and photographic practice. It summarizes the fundamental optics required for understanding photographic formulae. The relationship between the photometric exposure distribution at the sensor plane and the resulting digital raw data produced by the camera is described, as are the steps required to convert raw data into an output color image for a display. Other topics include focusing, framing, depth of field, photometric exposure, lighting, strategies for obtaining a suitable exposure, and camera image quality. The European Union as Protector and Promoter of Equality *Springer Nature* This book considers the European Union as a project with a major antidiscrimination goal, which is important to remember at a time of increasing resentment against particularly exposed groups, especially migrants, refugees, members of ethnic or religious minorities and LGBTI persons. While equality and non-discrimination have long been core principles of the international community as a whole, as is made obvious by the UN Charter and the Universal Declaration of Human Rights, they have shaped European integration in a particular way. The concepts of diversity, pluralism and equality have always been inherent in that process, the EU being virtually founded on the values of equality and non-discrimination. The Charter of Fundamental Rights of the EU contains the most modern and extensive catalogue of prohibited grounds of discrimination, supplementing the catalogue enshrined in the European Convention on Human Rights. EU law has given new impulses to antidiscrimination law both within Europe and beyond. The contributions to this book focus on how effective and credible the EU has been in combatting discrimination inside and outside Europe. The authors present different (mostly legal) aspects of that topic and examine them from various intra- and extra-European angles. **Nuclear Security Recommendations on Nuclear and Other Radioactive Material Out of Regulatory Control** *United Nations University Press* "This publication provides recommendations to a State for the nuclear security of nuclear or other radioactive material that has been reported as being out of regulatory control, as well as for material that is lost, missing or stolen but has not been reported as such, or has been otherwise discovered. It includes recommendations for the detection and assessment of alarms and alerts and for a graded response to criminal or unauthorized acts with nuclear security implications involving nuclear or other radioactive material out of regulatory control. The recommended actions cover the confirmation of a credible threat, assessment and interdiction of an attempted act and response to a nuclear security event."--Page 4 of cover. **Machinery Lloyd New Approaches to Gear Design and Production** *Springer* This is the third book in a series devoted to gear design and production. Comprising papers by scientists and gear experts from around the globe, it covers recent developments in practically all spheres of mechanical engineering related to gears and transmissions. It describes advanced approaches to research, design, testing and production of various kinds of gears for a vast range of applications, with a particular focuses on advanced computer-aided approaches for gear analysis, simulation and design, the application of new materials and tribological issues. **Bratva Vow a FREE dark mafia romance prequel** *Bell Press* **Monsters aren't born, they are created. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion,

pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets Hydraulic and Pneumatic Cylinders The Engineer Anchored Hearts An Entertaining Latinx Second Chance Romance *Zebra Books* From the USA Today bestselling author of *West Side Love Story* comes a second chance romance set on the beautiful sandy shores of Key West, the perfect beach read! Alejandro and Anamaría's love story is not to be missed!" —Mia Sosa, USA Today bestselling author of *The Worst Best Man* A PopSugar Best Romance of April Award-winning photographer Alejandro Miranda hasn't been home to Key West in years—not since he left to explore broader horizons with his papi's warning "never to come back" echoing in his ears. He wouldn't be heading there now if it wasn't for an injury requiring months of recuperation. The drama of a prodigal son returning to his familia and their beloved Cuban restaurant is bad enough, but coming home to the island paradise also means coming face to face with the girl he left behind—the one who was supposed to be by his side all along . . . Anamaría Navarro was shattered when Alejandro took off without her. Traveling the world was their plan, not just his. But after her father's heart attack, there was no way she could leave—not even for the man she loved. Now ensconced in the family trade as a firefighter and paramedic, with a side hustle as a personal trainer, Anamaría is dismayed that just the sight of Alejandro is enough to rekindle the flame she's worked years to put out. And as familia meddling pushes them together, the heat of their attraction only climbs higher. Can they learn to trust again, before the Key West sun sets on their chance at happiness? "Vibrant...A stunning romance of first love found again." —KirkusReviews **STARRED REVIEW** "Oliveras' portrayal of family and social media ties are reminiscent of Alisha Rai's romances." —Booklist **STARRED REVIEW** "Priscilla Oliveras sweeps you away to summer in Key West! Proceedings Springer Science & Business Media* A typical characterization of EuroSPI is reflected in a statement made by a company: ". . . the biggest value of EuroSPI lies in its function as a European knowledge and experience exchange mechanism for SPI and innovation. " Since its beginning in 1994 in Dublin, the EuroSPI initiative has outlined that there is not a single silver bullet to solve SPI issues, but that you need to understand a combination of different SPI methods and approaches to achieve concrete benefits. The fore each proceedings volume covers a variety of different topics, and at the conference we discuss potential synergies and the combined use of such methods and approaches. These proceedings contain selected research papers for five topics: Section I: SPI Tools Section II: SPI Methods Section III: SPI in SMEs Section IV: Economic Aspects of SPI Section V: The Future of SPI Section I presents studies on SPI tools. The authors provide an insight into new tools which can be used for SPI. Willem Bekkers et al. present a new assessment method and tool for software product management. Ismael Edrei-Espinosa-Curiel et al. illustrate a graphical approach to support the teaching of SPI. Paul Clarke and coworkers deal with an analysis and a tool to help real adoption of standards like ISO 12207 and they focus on SPI implementation and practices. Esparanca Amengual et al. present a new team-based assessment method and tool. *Twelve Years a Slave Prabhat Prakashan* "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt *Tires and Tracks The Hydraulic Handbook Elsevier* The first point of reference for design engineers, hydraulic technicians, chief engineers, plant engineers, and anyone concerned with the selection, installation, operation or maintenance of hydraulic equipment. The hydraulic industry has seen many changes over recent years and numerous new techniques, components and methods have been introduced. The ninth edition of the Hydraulic Handbook incorporates all these developments to provide a crucial reference manual for practical and technical guidance. *A True European Essays for Judge David Edward Bloomsbury Publishing* Judge David Edward has enjoyed a glittering career. After a substantial, successful period in Scotland, both as a practising advocate and professor of EC law, he was appointed to the Court of First Instance upon its creation in 1989. He was subsequently appointed to the Court of Justice where he has served for many years. This book has been prepared in honour of his retirement from that position in December 2003. The contributions reflect all aspects of Judge Edward's career as a lawyer, both in Scotland and in Luxembourg. In keeping with the respect with which he is held, contributions have been received from eminent members of the Scottish and Luxembourg judiciary, academics and practitioners. Not surprisingly, the main focus is on Community law, with important contributions on competition, institutional, substantive and remedial issues. This book will be an essential addition to the library of anyone with a genuine interest in Community law. *Examination and Certificates The Black Candle Rarebooksclub.com* This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 edition. Excerpt: ...The subterfuges they adopt to effect their purpose are very ingenious. In some cases Chinese seamen have been known to make temporary bootsocks of raw opium, others conceal it under their armpits, in their clothing, etc. By these methods they try to evade detection by H.M. Customs Officers and, if successful, they find a

good and ready market amongst the Chinese residents. "The raw opium is then boiled in a copper saucepan, allowed to get cool, and when it sets it is prepared in small pills for internal application, and in packets for smoking. The pills have an effect similar to that of smoking. The drug is then surreptitiously sold and used in the East and West ends of London. The inveterate opium smoker can usually be detected by his extraordinary sallow complexion, dreamy appearance and want of vitality. "Opium smoking dens are usually arranged in upper rooms of the houses. The windows of such places are invariably covered in such a way as to prevent the fumes escaping into the street, obviously for the purpose of avoiding detection. These rooms are fitted out either with wide wooden shelves or beds upon which recline those desirous of taking an opium smoke. These smokes vary in price from 2/-to 5/-according to the value of the drug and the financial position of those desiring to indulge. "When the Defence of Realm Act came into operation prohibiting opium smoking, etc., a number of these dens existed in 'Chinatown.' From this time until 1920 many prosecutions took place at the Thames Police Court and the offenders were fined, and in some cases imprisonment was imposed, but this did not deter the Chinamen a great deal, as when a fine was inflicted, it was at once paid and the 'Chink' continued... Cruising in Seraffyn *Lin and Larry Pardey* A fun and exciting guide to the world of living out at sea. This book will teach you what you need to know in order to live safely, economically and cheaply when spending months at sea. If nothing else, this book will send you chasing for your dreams, whether it be to take an adventure at sea or just about anything else. This is the first of a four-book series which begins on the journey that Lin and Larry Pardey began 34 years ago in their self-built 24-foot engineless cutter, Seraffyn. In this journey, we explore places such as Mexico, Central America, the Caribbean, and the Islands of the Atlantic ocean. Throughout the book, we learn about people and customs, we learn about the tricks of boating, we learn about survival. This 25th anniversary edition includes a new forward, new appendixes, and a color photo album showing Lin, Larry and the Seraffyn during those months at sea. Charlotte Mendelson, **Observer Book of the Year** Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her - the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here - Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader. **Yemen-- in Pictures** *Lerner Publications* Full-color and black-and-white photographs, charts, and maps highlight a close-up look at the Republic of Yemen on the southern tip of the Arabian Peninsula, a country that was formed in 1990 by the union of northern and southern Yemen. **I Am Calm An Activity Journal to Manifest Your Affirmation What Came Out of the Box A Biography of AGM Michell** Anthony George Maldon (AGM) Michell was undoubtedly one of the greatest Australian engineers. A prolific inventor, he is best known for his tilting pad thrust bearing. It remains one of the greatest inventions in lubrication science, and revolutionised ship propulsion - without it, modern shipping would not be possible. For the first time, this book reveals the story of Michell's fascinating life and astonishing achievements, and the motivations of the man behind the inventions. It weaves engineering and technology into the history of the early twentieth century. Michell made significant contributions to Australia's proud engineering heritage, and is truly one of our unsung heroes. **Pure Biology G.C.E (O Level).
