COMMUNITY CORRECTIONS

SAGE Publications Offering comprehensive coverage with an applied, practical perspective, Community Corrections, Second Edition covers all the major topics in the field while emphasizing reintegration and community partnerships and focusing strongly on assessment, risk prediction, and classification. Author Robert D. Hanser draws on his expertise with offender treatment planning, special needs populations, and the comparative criminal justice fields to present a complete assessment of the issues and challenges

facing community corrections today. Insights into how the day-to-day practitioner conducts business in community corrections are illustrated by such things as the increasing role technology plays in the field.

ENHANCING ENGLISH LEARNING EXPERIENCE FOR ESL LEARNERS: A NURSING INTERVENTION

Anchor Academic Publishing (aap_verlag) English is becoming an important language for foreign students who do not have English as their mother tongue. English as a second language is difficult to learn. Most of the learners are on their university study and are considered adult learners. The study was made to improve the English learning experience of international students whose aim is to learn the language. This book is about factors that affect the learning ability of English learners. Stress is one of the major factors in learning. There are some other factors that affect the ability to learn. Some of those factors are peer, environment, academics and teachers. This study suggests nursing interventions for teachers to enhance the learning ability of their students. This book can help other researchers to improve their studies regarding adult learning.

HANDBOOK FOR TEACHING INTRODUCTORY PSYCHOLOGY

VOLUME II

Psychology Press Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, "Issues and Approaches in Teaching Introductory Psychology," contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology.

ON ORBIT AND BEYOND

PSYCHOLOGICAL PERSPECTIVES ON HUMAN SPACEFLIGHT

Springer Science & Business Media As we stand poised on the verge of a new era of spaceflight, we must rethink every element, including the human dimension. This book explores some of the contributions of psychology to yesterday's great space race, today's orbiter and International Space Station missions, and tomorrow's journeys beyond Earth's orbit. Early missions into space were typically brief, and crews were small, often drawn from a single nation. As international cooperation in space exploration has increased over the decades, the challenges of communicating across cultural boundaries and dealing with interpersonal conflicts have become all the more important, requiring different coping skills and sensibilities than "the right stuff" expected of early astronauts. As astronauts travel to asteroids or establish a permanent colony on the Moon, with the eventual goal of reaching Mars, the duration of expeditions will increase markedly, as will the psychosocial stresses. Away from their home planet for extended times, future spacefarers will need to be increasingly self-sufficient, while simultaneously dealing with the complexities of heterogeneous, multicultural crews. "On Orbit and Beyond: Psychological Perspectives on Human Spaceflight," the second, considerably expanded edition of "Psychology of Space Exploration: Contemporary Research in Historical Perspective," provides an analysis of these and other challenges facing future space explorers while at the same time presenting new empirical research on topics ranging from simulation studies of commercial spaceflights to the psychological benefits of viewing Earth from space. This second edition includes an all new section exploring the challenges astronauts will encounter as they travel to asteroids, Mars, Saturn, and the stars, requiring an unprecedented level of autonomy. Updated essays discuss the increasingly important role of China in human spaceflight. In addition to examining contemporary psychological research, several of the essays also explicitly address the history of the psychology of space exploration. Leading contributors to the field place the latest theories and empirical findings in historical context by exploring changes in space missions over the past half century, as well as reviewing developments in the psychological sciences during the same period. The essays are innovative in their approaches and conclusions, providing novel insights for behavioral researchers and historians alike.

INTEGRAL INVESTING

FROM PROFIT TO PROSPERITY

Springer Nature Today, early-stage investors and entrepreneurs find themselves in a dilemma in which they must choose between profit and impact; between traditional, for-profit-only models on the one hand, and multiple-bottom-line structures with a positive social or environmental impact on the other. At a time in which climate change, exponentially growing technologies, social polarization, and looming pandemics are calling into question humanity's priorities, this Report to the Club of Rome and the World Academy of Art and Science dissolves this dilemma by proposing a new investment paradigm, namely Integral Investing. Integral Investing incorporates and transcends the best practices of both traditional venture capital and impact investing. It provides a seamless integration and shows how technological progress need not be our rival, but can instead be our ally in ensuring the prosperous society we all want. Drawing on her own investments and stellar track record since 1995, the author reveals the mechanism of Integral Investing. At the heart of it is a powerful, 360-degree de-risking tool called the Theta Model, which reveals how to make smart investment decisions based on the comprehensive integration of traditional due-diligence criteria, sustainability metrics, and assessments of the founders' and team culture. But it doesn't stop there. In turn, this handbook demonstrates how to use human-centered AI to scale and digitalize the investment process. The goal here is to accelerate the use of exponential tech, capital, and consciousness leadership to transition to a sustainable global society: a process the author refers to as the Investment Turnaround. The 21 principles of Integral Investing, which she defines using Ken Wilber's Integral Theory, lead to her manifesto on how to implement the UN Sustainable Development Goals within Planetary Boundaries by 2050 through early-stage investing and entrepreneurship. Similar to the 15th century, when the Medicis inspired the Renaissance, today humanity is once again at a crucial turning point where pioneering public and private financiers,

investors, entrepreneurs, and other committed individuals have the opportunity to leave behind the legacy of a prosperous society. This handbook provides a source of inspiration, and shows how self-actualization, a positive mindset, and a consciousness that is backed by a world-centric desire can become the driving force for solving the global grand challenges.

INTRODUCTION TO CORRECTIONS

SAGE Introduction to Corrections provides students with an understanding of basic concepts in the field of corrections. Designed for introductory corrections courses in criminal justice programs at two- and four-year schools, for both traditional ground and online settings, it offers comprehensive coverage of both institutional and community corrections, with particular emphasis on the perspective of the practitioner. Students taking corrections classes often have wild misconceptions about prison work and the corrections environment - misconceptions typically derived from movies and the news, and even current textbooks. In this new text, Robert Hanser uses his own on-the-ground experience to colorfully explain how the corrections system actually works, and what it's like to be a part of it.

FOUNDATIONS OF COUNSELING PEOPLE

A GUIDE FOR THE COUNSELING, PSYCHOLOGICAL, AND HELPING PROFESSIONS

Charles C Thomas Publisher Those in the counseling profession are interacting more with people from other cultures, the U.S. sphere of influence throughout the world is spreading, increasingly, we are providing services to clients who are not Caucasian or of European heritage, and our educational programs have been active in training both domestic students of diverse ethnic backgrounds as well as foreign students. These factors combine to contribute to the need for those who provide counseling to understand the elements involved in interacting with a wide spectrum of people. This book meets that need by providing a brief synopsis on such topics as common factors, values, universals, cross-cultural competence, and models, approaches, and psychological perspectives of human behavior (theories of personality). The emphasis is on material that relies more on the use of the scientific method and data instead of anecdotal and experiential literature. For the reader who is interested in obtaining information from which statements are derived, there are references to investigate the material further. Unlike other book that stress the barriers between counselor and client, this book adds the perspective that there are factors that facilitate interactions between the two. There are also frequent cross-cultural examples in the book. To facilitate awareness of similarities and differences in views of human behavior, samples of African, Arab, Chinese, and European/American perspectives are represented. There is also a relatively large section on applications. This consists of such subjects as cross-cultural aspects of psychological theories, ethics, research, tests, Euro-American approaches and experiences, client characteristics, client and counselor interactions, and therapeutic techniques. Many other topics are covered, as well. Students and professionals in the fields of counseling and psychology will find this book to be an invaluable addition to their library.

GENERAL PSYCHOLOGY FOR FILIPINO COLLEGE STUDENTS

Ateneo University Press

STYLE AND CREATIVITY IN DESIGN

Springer This book looks at causative reasons behind creative acts and stylistic expressions. It explores how creativity is initiated by design cognition and explains relationships between style and creativity. The book establishes a new cognitive theory of style and creativity in design and provides designers with insights into their own cognitive processes and styles of thinking, supporting a better understanding of the qualities present in their own design. An explanation of the nature of design cognition begins this work, with a look at how design knowledge is formulated, developed, structured and utilized, and how this utilization triggers style and creativity. The author goes on to review historical studies of style, considering a series of psychological experiments relating to the operational definition, degree, measurement, and creation of style. The work conceptually summarizes the recognition of individual style in products, as well as the creation of such styles as a process before reviewing studies on creativity from various disciplines, presenting case studies and reviewing works by master architects. Readers will discover how creativity is initiated by design cognition. A summary of the correlations between creativity and style, expressed as a conceptual formula describing the cognitive phenomenon of style and creativity concludes the work. The ideas presented here are applicable to all design fields, allowing designers to comprehend and improve their design processes to produce creative, stylistically unique products.

GUIDE TO COLLEGE READING

Longman Publishing Group Guide to College Reading focuses on the key areas of reading comprehension, vocabulary improvement, and textbook reading. Critical thinking and metacognition are hallmarks of the McWhorter series. Critical thinking is incorporated throughout the book in instruction, exercises, and readings. Metacognitive activities include teaching readers how to evaluate their own learning styles to increase their ability to read college-level material successfully. Exercises that ask readers to respond by writing sentences and paragraphs after reading help make the critical connection between these two activities. umerous diagrams and drawings help readers visualize how reading material can be organized. High-interest photographs and artwork appeal to the visual learner. Chapter-ending readings give immediate practice for chapter skills and aid in transferring these skills to actual reading situations. Learning Style Tips reinforce material introduced earlier throughout the book and teach readers how to apply knowledge of their

individual learning styles to learn new skills. For those interested in developing their reading skills at the 6th-9th grade level.
