HISTAMINE INTOLERANCE

HISTAMINE AND SEASICKNESS

Springer Histamine is an important mediator of allergic diseases, but knowledge of histamine as a cause of numerous non-allergic symptoms and signs is limited. This book offers wide-ranging coverage of histamine intolerance. There is extensive background discussion of the origin of histamine, its content in food and alcoholic beverages and intolerance to red wine. Diagnosis of histamine intolerance is explained and the various symptoms of histamine intolerance are clearly described. Subsequent chapters cover the relation of histamine to a wide variety of conditions, including drug intolerance, atopic dermatitis, seasickness and osteoporosis. This book will prove of value in clinical practice by facilitating differential diagnosis, which is by no means straightforward given the multiplicity of symptoms of histamine intolerance and by assisting in the selection of therapeutic measures.

NOTES OF A RADIOLOGY WATCHER

Springer Science & Business Media The Radiology Department is a pivotal part of any acute and/or comprehensive health care facility. The radiologist can no longer just “hide out” there. Matters of imaging are often public concerns, larger in scope than just the scheduling and managing of a series of image tests. Rather radiology is expensive, often intrusive and in some areas earnestly and endlessly controversial. A radiologist must be attuned to these often confounding contingencies. Two recent developments in the monitoring of education of radiologists can be impacted by the content of this book. For trainees in Radiology, and for that matter, for all trainees in every medical specialty in the U.S., a new accreditation system (NAS) has been put into place under the impetus and aegis of the ACGME, the Accreditation Committee for Graduate Medical Education, the body responsible for graduate medical evaluation and oversight in the U.S. Among its many innovations, the NAS curriculum is concerned with knowledge acquired about social and economic issues pertinent to each specialty. It is also focused on improving communication skills and about enhancing quality and safety. In the elaboration of “milestones” for residency education in these issues are codified into focused initiatives that must be addressed by each trainee as he or she advances in capability and seniority within the training interval.
