Immigration and Identity

Turmoil, Treatment, and Transformation

Jason Aronson Why do people migrate from one country to another? What is the difference between an immigrant and an exile? What determines the psychological outcome of immigration? Can one ever mourn the loss of one's country? What are the defensive functions of nostalgia? Are there specific guidelines for psychotherapy and psychoanalysis for immigrant patients? How can the therapist disentangle the patient's cultural rationalizations from underlying intrapsychic conflicts? In this unique book, psychoanalyst and poet Salman Akhtar provides answers to such questions. He notes that migration from one country to another has lasting effects on an individual's identity. Such identity change involves the dimensions of drives and affects, psychic space, temporality, and social affiliation. Dr. Akhtar addresses the immigrant's idealization and devaluation, closeness and distance, hope and nostalgia, transitional area of the mind, superego change, and linguistic transformation. With poignant clinical vignettes, he illustrates the implications of these ideas for the therapeutic process where the therapist, the patient, or both, are immigrants. Immigration and Identity, replete with poetry and personal letters from immigrant colleagues from many nations, conveys its message with irony, wit, laughter, pain, sadness, empathy, and, above all, clinical and human wisdom.

UK Immigration Made Simple

Taking the Complexity Out of UK Immigration Rules

[CreateSpace](#) Do you get a headache looking at the UK Government Visas and Immigration website? Were you planning to pay a lot of money to a UK immigration adviser? Wait! This book makes UK immigration simple. It answers in simple English the typical questions foreigners have about UK immigration and student visas in particular. London is one of the most desirable places to work in the world. Britain as a whole came out in a survey as the world's second favourite place to work. London welcomes talented people from around the world with open arms. According to research by New World Wealth, there are more \$ millionaires in London (376,600 - 2.8% of the population) than New York, Tokyo, Singapore and Hong Kong. One in every 35 residents has more than \$1 million to their name and the numbers are growing. The 2014 figure 376,600 was an increase of 36,600 over the figure for 2013. There are 840,000 millionaires living in the UK. There are many great opportunities available in the UK (Britain) for the skilled foreigner. Don't be left behind. Britain needs you if you are skilled and have good English. Britain has an ageing society. About 20% of the population are pensioners. An ageing society has problems paying its pensions because there are less people of working age around. To compound matters, there are less skilled people of working age around than needed. Immigration of young, skilled and hard-working people is the main solution. Britain's Office of Budget Responsibility has found that allowing more than 140,000 immigrants into Britain a year, equivalent to about 7 million people in 50 years, would help increase the overall number of people who are in work and improve public finances. Britain is a land where the government has provided an environment where the rule of law exists, where property rights are protected, where human initiative and hard work are encouraged and rewarded, where the local people are tolerant and where people from any background can succeed in their career or run an honest business and prosper. The UK is a land of promise and opportunity and the UK needs you if you have good written and spoken English, are young, skilled, hard-working, ambitious and willing to learn and adapt. With an ageing population, shortage of taxpayers to meet future pension payments, shortage of skilled professionals in a range of areas from medicine, engineering, IT, computer science, maths and science, social services and accountancy, the UK needs you. The UK has much to offer: among other things a politically stable nation, a law-abiding and tolerant people, world class universities, free schooling and child-friendly policies, free health care, and a beautiful country to live in. If you have the qualities mentioned above and are ready to acquire UK qualifications, if required, then nothing can stop your career from taking off in the UK. In this book the author, Rajiv Immanuel, answers the most commonly asked questions regarding UK immigration. This book answers questions relating to immigration, student visas, UK ancestry visas, work permits, spousal visas, and most importantly, permanent settlement in the UK. The author, arrived in the UK from India in 1995 as an international student. Now he, a British citizen, is a writer of books preparing others for UK life. If you are a resident of a country outside the European Economic Area, are young, skilled and ambitious and are considering making the UK your home, then the first step for you is to find out how to settle down permanently in the UK. This book tells you of conventions followed by the UKVI in granting permanent settlement that are outside of the published rules. Such information could help you settle down in the UK. The author too settled down in the UK on the basis of one such convention. Find out in this book and profit.

International Immigration Policy

A Theoretical and Comparative Analysis

[Springer](#) Numerous studies explore immigration policies of individual receiving countries. But these studies share several weaknesses. First and foremost, they are empirically orientated and lack a general theory. Second, most examine the policy of single country during a limited period, or, in a few cases, are contributed volumes analyzing each country separately. In general, immigration policy literature tends to be a-theoretic, to focus on specific periods and particular countries, and constitutes an array of discrete bits. This book is a response to this trend, offering a theoretical approach to immigration policy. It explains how governments decide on the number of immigrants they will accept; whether to differentiate between various ethnic groups; whether to accept refugees and on what basis; and whether to favour permanent immigration over migrant workers. The book also answers such questions as: How much influence do extreme-right parties have on the determination of immigration policy? Why do anti-immigration parties and initiatives enjoy greater success in local-state elections, and in the elections for the European Parliament, than in national elections? And under what circumstances does immigration policy become an electoral issue? Meyers draws on a wide array of sources on migration policy-making and using them derives proposed models in a way that few others have done before him. In addition, the book interrelates global and domestic factors that jointly influence government policy-making on international migration in a way that helps to clarify both spheres. Lastly, the work combines historical data with contemporary processes, in a way that draws lessons from the past while recognizing that changing circumstances usually revise governmental responses.

What Do We Know and What Should We Do About Immigration?

[SAGE](#) "A short, sharp and compelling book." The Observer Immigration to the UK over the last two decades has run at historically unprecedented levels, altering the face of our society and economy. As a result, immigration has become a deeply contentious political issue and many argue it was the driving force behind the Brexit vote. But how many of us truly understand the causes and consequences of immigration? In this book, Jonathan Portes (Chief Economist at the Cabinet Office, 2008-2011) provides a short history of immigration to the UK, before analysing its economic and social impacts, using current research and data to address commonly asked questions such as, does immigration reduce job opportunities for those born in the UK? Does it push down wages? And what is the impact of immigration on the public finances and public services? Portes then proposes what we should do about immigration in the future, outlining what a post-Brexit system should look like, and what, if anything, do we need to promote integration. ABOUT THE SERIES: The 'What Do We Know and What Should We Do About...?' series offers readers short, up-to-date overviews of key issues often misrepresented, simplified or misunderstood in modern society and the media. Each book is written by a leading social scientist with an established reputation in the relevant subject area. The Series Editor is Professor Chris Grey, Royal Holloway, University of London

States, Nations and Borders

The Ethics of Making Boundaries

[Cambridge University Press](#) This volume examines comparatively the views and principles of seven prominent ethical traditions on one of the most pressing issues of modern politics - the making and unmaking of state and national boundaries. The traditions represented are Judaism, Christianity, Islam, natural law, Confucianism, liberalism and international law. Each contributor, an expert within one of these traditions, shows how that tradition can handle the five dominant methods of altering state and national boundaries: conquest, settlement, purchase, inheritance and secession. Written by a distinguished group of international specialists this volume is unique in providing both in-depth normative and comparative perspectives on a troubling question that will offer readers real insight into inter-tradition conflict. Those readers will range from upper-level undergraduates to scholars in such fields as philosophy, political science, international relations and comparative religion.

The Economics of Immigration

Theory and Policy

[Springer Science & Business Media](#) The inspiration for this book came from a collaborative research project on immigration, begun in 2001, when we were colleagues at University of Nebraska- Lincoln (Bodvarsson was a Visiting Professor there in 2001-05). Our project dealt with the application of Say's Law to the supply of immigrant labor, meaning that when the supply of immigrant labor grows in an area, the new immigrants, being consumers, bolster labor demand and help to offset the lower wages they may bring about. Our test case was the seemingly obscure Dawson County, Nebraska, where the meatpacking industry experienced a relatively huge increase in Hispanic-born labor supply around 1990. We found for Dawson County this "demand effect" to be significant and our results for this test case generalizable to other, more prominent, test cases. This inspired us to study the famous Mariel Boatlift, where Miami's labor force grew suddenly by 7% due to the arrival of nearly 125,000 Cuban refugees in the spring of 1980. In that study, we showed that the Marielitos exerted a significant demand effect, which we argue helps to account for the stylized fact that the Mariel influx had a relatively benign effect on the Miami labor market. We had the privilege of presenting both studies at various conferences in the USA, Norway, Taiwan and Israel, and these studies have been published in Labour Economics and the Research in Labor Economics series (both studies are discussed in detail in this book).

Converging Paths to Restriction

French, Italian, and British Responses to Immigration

Demetrios G. Papademetriou and Kimberly Hamilton focus on how France, Italy, and the United Kingdom are responding to the complex issues raised by immigration and asylum matters. They explore the often trial-and-error character of governmental responses to these issues, the absence of mainstream political-party leadership, and the growing disjuncture between initiatives motivated by increasingly restrictionist impulses and practical efforts to further the immigrant integration at the local level. The Federalist Papers

[Read Books Ltd Classic Books Library](#) presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.
