Managerial Accounting McGraw-Hill/Irwin As the long-time best-seller, Garrison has helped guide close to 2 million students through the challenging waters of managerial accounting since it was first published. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. To achieve this, *Managerial Accounting, 12/E*, focuses, now as in the past, on three qualities: Relevance. Every effort is made to help students relate the concepts in this book to the decisions made by working managers. With insightful chapter openers, the popular *Managerial Accounting in Action* segments within the chapters, and stimulating end-of-chapter exercises, a student reading Garrison should never have to ask “Why am I learning this?”

The underlying thesis is that the company creates value only if the return on capital invested exceeds the cost of capital, while the objective is to demonstrate how integration of the fields of corporate finance and asset pricing enables comprehensive and accurate company valuation. Companies can thrive only if they are able to create value for shareholders over time. A company's value creation and the correct approach to its measurement require two main skills: first, the ability to analyze and evaluate the company's fundamentals with respect to its business model and its performance over time; and second, knowledge of investors' models with regard to risk diversification and return maximization from which the cost of capital for the firm is derived. Based on this perspective, the book combines rigorous quantitative analysis with effective use of graphics to aid intuitive understanding. **Accounting Principles 13th Edition Accounting Text and Cases** *Irwin/McGraw-Hill* **Accounting: Text & Cases, by Anthony, Hawkins, and Merchant** covers both financial and managerial accounting as well as broader managerial issues.
