The Education Invasion

How Common Core Fights Parents for Control of American Kids

Encounter Books Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self-governance in education, so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

Advances in Service-Oriented and Cloud Computing

Workshops of ESOC 2015, Taormina, Italy, September 15-17, 2015, Revised Selected Papers

Springer This volume contains the technical papers presented in the seven high-quality workshops associated with the European Conference on Service-Oriented and Cloud Computing, ESOC 2015, held in Taormina, Italy, in September 2015: Third International Workshop on Cloud for IoT (CLIoT 2015), 5th International Workshop on Adaptive Services for the Future Internet (WAS4FI 2015), Second Workshop on Seamless Adaptive Multi-cloud Management of Service-Based Applications (SeaClouds 2015), First International Workshop on Cloud Adoption and Migration (CloudWay 2015), First International Workshop on Digital Enterprise Architecture and Engineering (IDEA 2015), First Workshop on Federated Cloud Networking (FedCloudNet 2015). Abstracts of the presentations held at the European Projects Forum (EU Projects 2015) are included in the back matter of this volume. The 25 full papers and 6 short papers were carefully reviewed and selected from 48 submissions. They focus on specific topics in service-oriented and cloud computing domains such as limits and /or advantages of existing cloud solutions, Future Internet technologies, efficient and adaptive deployment and management of service-based applications across multiple clouds, novel cloud service migration practices and solutions, digitization of enterprises in the cloud computing era, federated cloud networking services.

From GCSEs to EBCs

The Government's Proposals for Reform, Eighth Report of Session 2012-13, Vol. 1: Report, Together with Formal Minutes; and Appendices

The Stationery Office The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much, too fast. Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system. GCSEs need "significant improvements" in order to restore public confidence in the exam system, but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair. MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate, where students will be taking GCSEs for some time to come, according to the Government's plans. The report also questions how well the Government's proposals will serve lower attaining pupils, who are often the most disadvantaged. There is no evidence that the proposed changes will help to tackle under-achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs. The Government is also called upon to re-think its plans for a Statement of Achievement specifically for lower attaining pupils. MPs agree that changes are needed to the way in which exams are run, but they raise serious concerns about franchising subjects to exam boards. The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system. MPs also note the wide-ranging stakeholder opposition to many of the Government's proposals.

OECD Development Pathways Multi-dimensional Review of Uruguay Volume 1: Initial Assessment

Volume 1: Initial Assessment

OECD Publishing This first volume of OECD's multidimensional review presents an initial assessment and finds that Uruguay has benefited from a favourable economic context over the last decade, but faces significant challenges.

Teaching With Technologies: The Essential Guide

The Essential Guide

McGraw-Hill Education (UK) This book focuses on the current state of play with the integration of digital technologies into school-based teaching and learning. As well as a comprehensive analysis of developments to date it identifies 'what works' with technology and education.

Independent Schools Yearbook 2011-2012

The 'Bible' for Information on Independent Schools

A&C Black The Independent Schools Yearbook is the highly-respected book of reference of Independent Schools in membership of the Independent Schools Council's Associations: HMC, GSA, SHMIS, IAPS, ISA and COBIS. Published and updated annually since 1889 the 'Blue Book' is often referred to as the 'Bible' of information on independent schools. More than 1,400 School Profiles with information on Contact details, Location, Facilities, Numbers, Admission, Fees, Scholarships and Bursaries, Staff, Curriculum, Sports/Games, The Arts, Extra-Curricular Activities, Community Service, Recent/Planned Developments, News and Events. "May I say how valuable and useful your publication proves itself to be - I regularly direct parents to it when considering senior school options as well as using it extensively myself." Head of an IAPS School (Jan 2011)

Assessing English Language Learners

Theory and Practice

Routledge Assessing English Language Learners explains and illustrates the main ideas underlying assessment as an activity intimately linked to instruction and the basic principles for developing, using, selecting, and adapting assessment instruments and strategies to assess content knowledge in English language learners (ELLs). Sensitive to the professional development needs of both in-service and pre-service mainstream teachers with ELLs in their classrooms and those receiving formal training to teach culturally and linguistically diverse students, the text is designed to engage readers in viewing assessment as a critical part of teaching appreciating that assessments provide teachers with valuable information about their students' learning and thinking becoming aware of the relationship among language, culture, and testing understanding the reasoning that guides test construction recognizing the limitations of testing practices being confident that assessment is an activity classroom teachers (not only accountability specialists) can perform Highlighting alternative, multidisciplinary approaches that address linguistic and cultural diversity in testing, this text, enhanced by multiple field-tested exercises and examples of different forms of assessment, is ideal for any course covering the theory and practice of ELL assessment.

MDPI This book is a printed edition of the Special Issue "Raspberry Pi Technology" that was published in Electronics

Research for Educational Change

Transforming researchers' insights into improvement in mathematics teaching and learning

Routledge Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms. Combining two discourses - that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice - the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

PISA 2012 Assessment and Analytical Framework Mathematics, Reading, Science, Problem Solving and Financial Literacy

Mathematics, Reading, Science, Problem Solving and Financial Literacy

OECD Publishing This book presents the conceptual framework underlying the fifth cycle of PISA, which covers reading, science and this year's focus: mathematical literacy, along with problem solving and financial literacy.

Public Speaking: The Evolving Art

Cengage Learning Coopman and Lull's PUBLIC SPEAKING: THE EVOLVING ART, 4th Edition, combines time-tested techniques with innovative variations on the well-respected traditions of public speaking instruction to equip you with the skills you need to become a confident, competent, and ethical public speaker. It illustrates the evolution of public speaking as an art form -- from Greek and Roman traditions to the most contemporary forms of public address, including the use of presentation media. Packed with examples from popular culture, it analyzes the public speaking success of such contemporary figures as Bernie Sanders and Malala Yousafzai. It also includes numerous prompts to help you put your new skills into practice -- in the classroom, community, and professional context. **Important Notice:** Media content referenced within the product description or the product text may not be available in the ebook version.

The National Curriculum in England (2020 Update)

In this UPDATED edition of the National Curriculum for England for Key Stages 1 and 2, you will find full programmes of study for all 11 original primary subjects plus three new subjects: Relationships Education; Relationships and Sex Education; and Health Education (to be taught in English schools in September 2020). The National Curriculum for England sets out the framework for the national curriculum at key stages 1 and 2. This statutory guidance includes information about the school curriculum and the national curriculum the aims for the national curriculum statements on inclusion, and on pupils' competence in numeracy and maths, language and literacy across the school programmes of study for KS 1 and 2 for all the subjects that are taught at these key stages.

PISA The ABC of Gender Equality in Education Aptitude, Behaviour, Confidence

Aptitude, Behaviour, Confidence

OECD Publishing This fascinating compilation of the recent data on gender differences in education presents a wealth of data, analysed from a multitude of angles in a clear and lively way.

Introducing the IB Diploma Programme

Cambridge University Press An ideal reference guide to introducing the IB Diploma in your school.

Research in Early Childhood Science Education

Springer This book emphasizes the significance of teaching science in early childhood classrooms, reviews the research on what young children are likely to know about science and provides key points on effectively teaching science to young children. Science education, an integral part of national and state standards for early childhood classrooms, encompasses not only content-based instruction but also process skills, creativity, experimentation and problem-solving. By introducing science in developmentally appropriate ways, we can support young children's sensory explorations of their world and provide them with foundational knowledge and skills for lifelong science learning, as well as an appreciation of nature. This book emphasizes the significance of teaching science in early childhood classrooms, reviews the research on what young children are likely to know about science, and provides key points on effectively teaching young children science. Common research methods used in the reviewed studies are identified, methodological concerns are discussed and methodological and theoretical advances are suggested.

The Geneva Papers

40 Years at the Cutting Edge of Research in Insurance Economics

Springer In January 1976, Raymond Barre, the first President of The Geneva Association, and Orio Giarini, its first Secretary General, founded The Geneva Papers on Risk and Insurance with the main goal of supporting and encouraging research in the economics of risk and insurance. At that time, research in the field of insurance was still embryonic and insurance was regarded as peripheral social activity. When sustained economic growth gained traction, the function of insurance gradually emerged as a key contributor to economic development. By integrating uncertainty into economic theory and benefiting from the progress of both financial economics and decision theory, research developed further in the field of insurance economics and risk management, and is now prolific. The Geneva Papers on Risk and Insurance undeniably contributed to this evolution and its impact on research in insurance has largely exceeded what its two founding members could have expected. This volume is a special collection of papers celebrating 40 Years of The Geneva Papers on Risk and Insurance. The collection looks back at the storied history of The Geneva Papers on Risk and Insurance and features papers from some of the esteemed authors who have contributed to the journal in its lifetime. This collection of papers highlights just a few of the many themes addressed in the papers published by the journal since it was created. Nevertheless, the selection exemplifies the richness and variety of topics the field of insurance covers.

Algebra and Geometry

American Mathematical Soc. This is the second of three volumes that, together, give an exposition of the mathematics of grades 9–12 that is simultaneously mathematically correct and grade-level appropriate. The volumes are consistent with CCSSM (Common Core State Standards for Mathematics) and aim at presenting the mathematics of K–12 as a totally transparent subject. The first part of this volume is devoted to the study of standard algebra topics: quadratic functions, graphs of equations of degree 2 in two variables, polynomials, exponentials and logarithms, complex numbers and the fundamental theorem of algebra, and the binomial theorem. Having translations and the concept of similarity at our disposal enables us to clarify the study of quadratic functions by concentrating on their graphs, the same way the study of linear functions is greatly clarified by knowing that their graphs are lines. We also introduce the concept of formal algebra in the study of polynomials with complex coefficients. The last three chapters in this volume complete the systematic exposition of high school geometry that is consistent with CCSSM. These chapters treat the geometry of the triangle and the circle, ruler and compass constructions, and a general discussion of axiomatic systems, including non-Euclidean geometry and the celebrated work of Hilbert on the foundations. This book should be useful for current and future teachers of K–12 mathematics, as well as for some high school students and for education professionals.

K-12 Education: Concepts, Methodologies, Tools, and Applications

Concepts, Methodologies, Tools, and Applications

IGI Global Primary and Secondary education is a formative time for young students. Lessons learned before the rigors of higher education help to inform learners' future successes, and the increasing prevalence of learning tools and technologies can both help and hinder students in their endeavors. K-12 Education: Concepts, Methodologies, Tools, and Applications investigates the latest advances in online and mobile learning, as well as pedagogies and ontologies influenced by current developments in information and communication technologies, enabling teachers, students, and administrators to

make the most of their educational experience. This multivolume work presents all stakeholders in K-12 education with the tools necessary to facilitate the next generation of student-teacher interaction.

Educational Practices in Germany: An Overview

Penerbit USM Educational Practices in Germany: An Overview discusses the Malaysian and German researchers' perspective on the educational practices in German schools. The foci of this book are on the education system, classroom management and teacher education, integration of ICT in classrooms, teaching and learning of science and mathematics at the secondary school level, influence of cultural aspects as well as extracurricular activities in German schools.

FOCUS on College and Career Success

Cengage Learning Steve Staley and Constance Staley's FOCUS ON COLLEGE AND CAREER SUCCESS is uniquely equipped to turn the tides regarding retention among first-year college students, particularly at career, technical, and proprietary schools. Visually appealing, research-based, and highly motivational, this text thoroughly engages students with direct applications and immediate results. Steve Staley has been teaching at Colorado Technical University for 30 years and is intimately familiar with the specialized student needs of career and technical students. Constance Staley, one of the best-known names in the field of motivation and student engagement, provides a wealth of tools to help students of varied learning styles succeed in their first year of college and beyond. Thoroughly researched, the text covers the topics most important to student success and incorporates the underlying themes of professionalism, motivation, and self-discipline throughout. Rather than talking down to students or speaking over their heads, FOCUS ON COLLEGE AND CAREER SUCCESS initiates a personal and informal conversation with readers, directly connecting them with and drawing them into text discussions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Math and Science for Young Children

Cengage Learning MATH AND SCIENCE FOR YOUNG CHILDREN, Eighth Edition, introduces readers to engaging math and science experiences for early childhood and early elementary education programs, and provides an organized, sequential approach to creating a developmentally appropriate math and science curriculum. The content aligns with key guidelines and standards: The National Association for the Education of Young Children's (NAEYC) Professional Preparation Standards (2010); Developmentally Appropriate Practice (DAP) guidelines; Common Core Mathematics Standards; and Next Generation Science Standards (NGSS). The book also addresses STEM/STEAM and the essential domains of child growth and development during the crucial birth-through-eight age range. A valuable resource for the student/future teacher, working professional, or involved parent, MATH AND SCIENCE FOR YOUNG CHILDREN emphasizes the interrelatedness of math and science and how they can be integrated into all other curriculum areas. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

These CBSE Term 2 Sample Papers Class 12 English Core, Physics, Chemistry & Mathematics 2022 | CBSE Term 2 Books Class 12 English Core, Physics, Chemistry & Mathematics 2022 Help to Prepare Better for Term 2 Board Exams 2022. Get Free E-Assessments of Oswaal360 based on the latest Typologies of Questions as per CBSE Term-II syllabus.

Teaching and Learning of Energy in K – 12 Education

Springer Science & Business Media This volume presents current thoughts, research, and findings that were presented at a summit focusing on energy as a cross-cutting concept in education, involving scientists, science education researchers and science educators from across the world. The chapters cover four key questions: what should students know about energy, what can we learn from research on teaching and learning about energy, what are the challenges we are currently facing in teaching students this knowledge, and what needs to be done to meet these challenges in the future? Energy is one of the most important ideas in all of science and it is useful for predicting and explaining phenomena within every scientific discipline. The challenge for teachers is to respond to recent policies requiring them to teach not only about energy as a disciplinary idea but also about energy as an analytical framework that cuts across disciplines. Teaching energy as a crosscutting concept can equip a new generation of scientists and engineers to think about the latest cross-disciplinary problems, and it requires a new approach to the idea of energy. This book examines the latest challenges of K-12 teaching about energy, including how a comprehensive understanding of energy can be developed. The authors present innovative strategies for learning and teaching about energy, revealing overlapping and diverging views from scientists and science educators. The reader will discover investigations into the learning progression of energy, how understanding of energy can be examined, and proposals for future directions for work in this arena. Science teachers and educators, science education researchers and scientists themselves will all find the discussions and research presented in this book engaging and informative.

FOCUS on Community College Success

Cengage Learning FOCUS ON COMMUNITY COLLEGE SUCCESS, 4th Edition, speaks directly to community college students, delivering strategies for navigating the unique challenges of juggling school, family, work, and living/studying at home. Updated with the most current research, this forward-thinking text continues to strive to improve student retention, motivation, and engagement, as well as offer proof of student progress and course efficacy through the Entrance and Exit Interviews. The fourth edition includes expanded coverage on resilience, with strategies for assessing and building resilience. A revised section on the importance of group work gives students the tools they need to successfully collaborate. Now available with MindTap, a fully online, highly personalized learning experience built upon FOCUS ON COMMUNITY COLLEGE SUCCESS. MindTap combines learning tools—readings, multimedia, activities, and assessments—into a singular Learning Path that guides students through their course. Staley, a leader in the field of motivation, helps students develop realistic expectations of what it takes to learn while encouraging and engaging them with direct applications and immediate results. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Broken Ladder

The Paradox and Potential of India's One-Billion

Cambridge University Press This book explains the paradox of India's rapid growth and widespread poverty by looking at hundreds of life stories and the latest research.

Eurostat-OECD Methodological Manual on Purchasing Power Parities (2012 Edition)

OECD Publishing This manual gives a complete, detailed and up-to-date description of the Eurostat-OECD PPP Programme, including its organisation, the various surveys carried out by participating countries and the ways PPPs are calculated and disseminated. It also provides guidance on the use of PPPs.

Informatics in Schools. Sustainable Informatics Education for Pupils of all Ages

6th International Conference on Informatics in Schools: Situation, Evolution, and Perspectives, ISSEP 2013, Oldenburg, Germany, February 26 -- March 2, 2013, Proceedings

Springer This book constitutes the refereed proceedings of the 6th International Conference on Informatics in Schools: Situation, Evolution, and Perspectives, ISSEP 2013, held in Oldenburg, Germany, in February/March 2013. The 15 full papers included in this volume were carefully reviewed and selected from 48 submissions; in addition the book contains two keynote talks in full-paper length. The contributions are organized in topical sections named: from computer usage to computational thinking; algorithmic and computational thinking; games; informatics in the context of other disciplines; and competence-based learning and retention of competencies.

Public Key Infrastructures, Services and Applications

9th European Workshop, EuroPKI 2012, Pisa, Italy, September 13-14, 2012, Revised Selected Papers

Springer This book constitutes the thoroughly refereed post-conference proceedings of the 9th European Workshop, EuroPKI 2012, held in Pisa, Italy, in September 2012. The 12 revised full papers presented were carefully selected from 30 submissions and cover topics such as Cryptographic Schemas and Protocols, Public Key Infrastructure, Wireless Authentication and Revocation, Certificate and Trusted Computing, and Digital Structures.
