HOUSING AND COMMUTING: THE THEORY OF URBAN RESIDENTIAL STRUCTURE

A TEXTBOOK IN URBAN ECONOMICS

World Scientific Publishing Company The field of urban economics is built on an analysis of housing prices, land rents, housing consumption, spatial form, and other aspects of urban residential structure. Drawing on the journal publications and teaching notes of Professor John Yinger of Syracuse University, Housing and Commuting: The Theory of Urban Residential Structure presents a simple model of urban residential structure and shows how the model's results change when key assumptions are made more realistic. This book provides a wide-ranging introduction to research on urban residential structure. Topics covered range from theoretical analysis of urban structure with different transportation systems or multiple worksites to empirical work on the impact of local public services on house values and the impact of racial prejudice and discrimination on housing choices. Graduate students and scholars who want to learn about research in urban economics will find this book to be a good starting point. Request Inspection Copy

HOMES & INTERIORS, STUDENT EDITION

McGraw-Hill Education Homes & Interiors offers content appropriate for both an interior design course and a consumer-based housing course. This edition places even greater emphasis on the interior design process. Units 1 & 2 address housing from a consumer point-of-view. Units 3 & 4 focus on the actual structure and style of homes. Units 5 & 6 familiarize students with the interior design process. Special topics that are highlighted include Consumer Considerations, Commercial Applications, The Impact of Technology, and Careers in Housing and Interiors. Homes & Interiors introduces students to the myriad of career pathways in housing and interior design.

DEPARTMENTS OF VETERANS AFFAIRS AND HOUSING AND URBAN DEVELOPMENT, AND INDEPENDENT AGENCIES APPROPRIATIONS FOR 1997: ENVIRONMENTAL PROTECTION AGENCY**MORBIDITY AND MORTALITY WEEKLY REPORT****MMWR****POLICIES AND PROGRAMS FOR SUSTAINABLE ENERGY INNOVATIONS****RENEWABLE ENERGY AND ENERGY EFFICIENCY**

Springer This volume features research and case studies across a variety of industries to showcase technological innovations and policy initiatives designed to promote renewable energy and sustainable economic development. The first section focuses on policies for the adoption of renewable energy technologies, the second section covers the evaluation of energy efficiency programs and the final section provides evaluations of energy technology innovations. Environmental concerns, energy availability and political pressure have prompted governments to look for alternative energy resources that can minimize the undesirable effects for current energy systems. For example, shifting away from the conventional fuel resources and increasing the percentage of electricity generated from renewable resources, such as solar and wind power, is an opportunity to guarantee lower CO2 emissions and to create better economic opportunities for citizens in the long run. Including discussions of such of timely topics and issues as global warming, bio-fuels and nuclear energy, the editors and contributors to this book provide a wealth of insights and recommendations for sustainable energy innovations.

UBICOMP 2007: UBIQUITOUS COMPUTING**9TH INTERNATIONAL CONFERENCE, UBICOMP 2007, INNSBRUCK, AUSTRIA, SEPTEMBER 16-19, 2007, PROCEEDINGS**
