Swing Trading using the 4-hour chart 3

Part 3: Where Do I Put My stop?

DAO PRESS Swing Trading using the 4-hour chart Part 3: Where Do I Put My stop? In the third part of the series on "Swing Trading using the 4-hour chart", the Heikin Ashi Trader treats the question on where the stop should be. Once a trader stops introducing stops, he will discover that his hit rate will worsen. However, by doing this he gains full control of the trade management. Stops are therefore not unavoidable, but remain an integral part of a trading system that is profit-oriented. Well understood stops are downright the actual instrument that makes profit possible. Since money is only earned when he exits the trade, the trader should try to perform the stop management with the utmost care. The formulation of crystal-clear rules, both for trend trades as well as for trades with a fixed target, after all, is the requirement to ensure that the trader is playing his own game. Every successful trader has ultimately developed his own rules. No matter what the market does, this trader always plays his own game and can be swayed by anything. Precisely the persistence and consistency with which he operates in the market ensures that he becomes one day the "Master of the Game". Table of Contents 1. Are Stops Necessary? 2. Trade Against the Trend!

DAO PRESS The brokerage industry usually recommends that new traders trade with the trend. But is trading this way profitable? It is said that if you go with the trend, the likelihood that you will win is higher. Unfortunately, experience shows that most traders cannot build a profitable business this way. Old and experienced traders used to say: You have to buy when blood flows in the streets. That means that you should act against the trend. Actually, this saying is the expression of common sense itself. The question remains: Why do traders find it so hard to put this wisdom into practice? The new book by Heikin Ashi Trader gives ideas and tips on how to recognize such countertrend signals in the stock market, since these are usually the best trading opportunities. Table of Contents Part 1: The Snapback Trading Strategy Chapter 1: Trade when the mass is afraid Chapter 2: Why I do not follow the trend Chapter 3: Mean Reversion Chapter 4: Risk Management Chapter 5: How do I recognize extreme movements? How to start a trading business with 500\$?

DAO PRESS How to start a Trading Business with \$500 Many new traders have little capital available in the beginning, but this is not an obstacle to starting a trading career anyway. However, this book is not about how to grow a \$500 account into a \$500,000 account. It is precisely these exaggerated return expectations that bring most beginners to failure. Instead, the author shows, in a realistic way, how you can become a full-time trader in spite of limited start-up capital. This applies both for traders who want to remain private, as well as for those who want to eventually trade customer funds. This book shows step by step how to do it. In addition, there is a concrete action plan for each step. Anyone can be a trader in principle, if he or she is willing to learn how this business works. Contents 1. Deel 3: Hoe kan ik mijn trading resultaten evalueren?

Peter Devaere Scalpen is leuk! Deel 3: Hoe kan ik mijn trading resultaten evalueren Scalpen is de snelste manier om geld te verdienen op de beurs. Er is nauwelijks een methode die effectiever het geld van een trader kan vermeren. Waarom dit zo is, vertelt de Heikin Ashi Trader in deze vierdelige serie over scalpen. In het derde boek richt zich de Heikin Ashi Trader op de vraag hoe de scalper zijn handelsresultaten naar behoren kan evalueren. Op basis van de wekelijkse resultaten van één enkele trader wijst hij op welke factoren werkelijk van belang zijn met het oog op blijvend succes op de beurs. Deel 4: Trading is flow business Scalping is de snelste manier om geld te verdienen op de aandelenmarkt. Het is heel erg moeilijk om een methode te vinden waardoor het kapitaal van een trader nog effectiever toeneemt. In deze vierdelige reeks vertelt Heikin Ashi hoe dit komt. De zeer effectieve strategie is erg eenvoudig en kan onmiddellijk worden toegepast omdat ze universeel is en bruikbaar op alle forex/aandelenmarkten. Ze kan gebruikt worden voor korte periodes, zoals op een 1-minuutgrafiek, maar ook voor langere periodes.

Deel 4: Trading is flow-business

DAO PRESS Scalpen is leuk! Deel 4: Trading is flow-business Winsten op de beurs komen meestal niet-synchroon alsof het over een soort kantoorbaan zou gaan, netjes verdeeld over de 20 handelsdagen per maand. De ervaring leert dat de resultaten asymmetrisch optreden. Er zijn dagen waarop het loopt als een klok en dagen waarop de handel alleen maar verlies lijkt te produceren. In dit vierde deel van de reeks "Scalpen is leuk!" gaat de Heikin Ashi Trader dieper in op het juiste moment voor de handel. Succesvolle traders weten vooral wanneer ze niet moeten handelen. Zij richten zich op de momenten wanneer de marktomstandigheden optimaal zijn. Het plezier aan de handel komt dan vanzelf, en daarmee het succes. In deze toestand van "flow" is de nodige discipline ook gemakkelijker. Snel scalpen bevordert het snelle sluiten van verlies-posities en ook de snelle realisatie van de opgelopen winst, dat is net zo belangrijk. Inhoud 1. Handel alleen als het leuk is 2. Hoe ontwikkel je een winstgevende handelsstrategie?

Waarom je net het tegenovergestelde moet doen van wat de meeste traders proberen

DAO PRESS Hoe ontwikkel je een winstgevende handelsstrategie Waarom je net het tegenovergestelde moet doen van wat de meeste traders proberen De enige reden waarom traders de aandelenmarkt betreden, is om punten, ticks en pips te verzamelen. Zo veel en zo snel mogelijk. Al de rest is tijdverlies en waardeloze analyse. Daarom hebben traders nood aan een methode, een systeem dat precies dit doet: permanent kleine winsten binnenhalen, wat meestal uitdraait op een aanzienlijk stijging van het rekeningsaldo. Daarom neemt de auteur de klassieke raad "beperk je verlies en laat je winst de vrije loop" onder de loep. In dit boek doet hij het tegenovergestelde van de goedbedoelde raad: houd winsten zo klein mogelijk en kies je verliezen zo groot mogelijk. In het tweede deel van het boek onderzoekt hij een strategie, die werkt met deze premisse. En de historische back test geeft hem gelijk. Als traders het tegenovergestelde doen van wat de menigte probeert, dan boeken ze eindelijk succes! Inhoudstafel Deel 1: Doe het tegenovergestelde van wat de meeste traders proberen! 1. Swingtrading met de 4-uurgrafiek 2

Deel 2: Trade the Fake!

DAO PRESS Swingtrading met de 4-uurgrafiek Deel 2: Trade the Fake! In dit tweede deel uit de reeks "Swingtrading met de 4-uurgrafiek" gaat de Heikin Ashi trader in op het fenomeen van stop-fishing en fakeout. Dit zijn de vele schijnbewegingen die de grote spelers en de algoritmen in de huidige financiële markten in scène zetten. Deze lijken meer de regel te zijn dan de uitzondering. Maar een gewiekste swingtrader kan net gebruik maken van deze situatie als hij de bal terugkaatst. In plaats van zich door de vele trucs van de smart money te laten vangen, kan hij deze kenmerken op de grafiek leren herkennen. Hieruit vloeit een zeer winstgevende swingtrading strategie voort die zich uitsluitend toelegt op het opsporen van de zogenaamde "fakes". Want vaak blijkt dat de schijnbewegingen van de grote spelers het startschot vormen voor een belangrijke beweging. Meestal is het dan ook nuttig om ze te traden. Aan de hand van verschillende voorbeelden in verschillende markten en grafiek-technische situaties, volgt de auteur het spoor van de smart money. Met wat oefening dan kan elke trader de trucs op een grafiek ontdekken en de achterliggende bedoelingen achterhalen. Een dergelijke strategie zou stroken met de omstandigheden van de huidige markten in plaats van je te wagen aan oude methoden om "de markt te verslaan" Inhoudsopgave 1. Forex Trading

De volledige reeks

Dao Press Forex Trading De volledige reeks Het is bekend dat valutamarkten worden bepaald door nieuws. Omdat nieuws echter zeldzaam is, bewegen de meeste valutaparen 80% van de tijd zijwaarts. Met andere woorden, het is heel moeilijk om met trendstrategieën in forex winstgevend te handelen. De reeks "Forex Trading" behandelt daarom strategieën die speciaal zijn ontworpen voor zijwaartse markten. Heikin Ashi Trader bespreekt ook waarom traders die gespecialiseerd zijn in forex trading de neiging hebben om slechts één strategie tegelijkertijd te handelen. Ze doen dit omdat ze geloven dat deze superieur is aan andere handelsmethoden. Helaas maakt deze aanpak hen kwetsbaar voor de ups en downs van deze ene strategie. Echter, door winst en verlies te verdelen over verschillende strategieën, ontwikkelt de trader een onverschilligheid voor de verliesreeksen van elke

afzonderlijke strategie. Als hij elke strategie beschouwt als een beleggingsinstrument in zijn portefeuille, net als een aandeel of een fonds, krijgt hij een objectiever beeld van wat er in de markten gebeurt. Inhoudsopgave Deel 1 : Twee strategieën gebaseerd op het ronde getal Inleiding Strategie 1: De strategie gebaseerd op het ronde getal Strategie 2: De stop-hunting strategie Beschouw forex trading als een waarschijnlijkheidsspel Deel 2: Twee strategieën met de weekly pivots Hoe verhandel je de weekly pivots? Swingtrading met de 4-urgrafiek 3

Deel 3: Waar zet ik mijn stop?

DAO PRESS Swingtrading met de 4-urgrafiek Deel 3: Waar zet ik mijn stop? In dit derde deel uit de reeks "Swingtrading met behulp van de 4-urgrafiek" behandelt de Heikin Ashi Trader de vraag waar je je stop moet plaatsen: van zodra een trader stopt, zal hij vaststellen dat zijn slaagkans afneemt. Zo behoudt hij de volledige controle over het handelsmanagement. Stops zijn dus niet onvermijdelijk, ze blijven een integraal onderdeel van een handelssysteem dat winst beoogt. Als de registers goed begrepen worden, biedt dit mogelijkheid tot winst. Aangezien je pas geld verdient wanneer je de handel afsluit, is het belangrijk dat de trader probeert zijn stops zo zorgvuldig mogelijk te beheren. Het formuleren van kristalheldere regels, zowel voor trendtrades als voor trades met een vast doel, is altijd een vereiste om als trader het spel zelf in handen te hebben. Tenslotte heeft elke succesvolle trader zijn eigen regels opgesteld. Eender wat de markt doet, deze trader speelt zijn eigen spel en kan zich door alles laten beïnvloeden. Vooral de volharding en consequentie waarmee hij optreedt op de markt zorgt ervoor dat hij op een dag "spelleider" wordt. Inhoudsopgave 1. Zijn stops noodzakelijk? 2. Wat is een stop-loss order? 3. Hoe verhandel je een range?

Handel in de meest interessante markt ter wereld

DAO PRESS Hoe verhandel je een range? Verhandel de meest interessante markt ter wereld Het is bewezen dat meer dan 70% van het marktgebeuren in trading ranges of zijwaartse fasen verloopt. Het lijkt er dan op dat er vooral veel geld te verdienen valt in de trendfasen en dat de trendloze markten gemeden moeten worden omdat hier geen eer mee te behalen is. De meeste traders zijn daarom op zoek naar een grote beweging. Uit ervaring leren we echter dat het verhandelen van dergelijke "moves" of "trends" helemaal niet zo eenvoudig is. Ofwel herken je de trend te laat, of de beweging biedt haast geen mogelijkheden om in te stappen. Maar er bestaat een gespecialiseerde groep van traders die geen interesse hebben in de trend, maar die net het tegenovergestelde doen, namelijk de trendloze fase verhandelen. Het boek beschrijft de methoden en tactieken van deze traders. Het gaat dus niet over hoe je een range identificeert om dan de uitbraak hieruit te verhandelen, maar over hoe je de range zelf verhandelt. Inhoudsopgave 1. Inleiding in de range trading 2. Hoe vind je unieke opportuniteiten?

Heilige Koeien 2

DAO PRESS Men adviseert traders vaak om te werken met een kans-risicoverhouding van 1:2. Op deze manier zouden ze "slechts" een hit-rate van iets meer dan 33,33% nodig hebben om winstgevend te kunnen handelen. Wiskundig gezien klopt dit natuurlijk en het klinkt ook aannemelijk. De vraag is of het ook zo werkt. In dit boekje van de reeks "Heilige koeien" gaat Heikin Ashi Trader op zoek naar trades met een kans-risicoverhouding van ten minste 1:10 of hoger. Hij vertrekt vanuit de vaststelling dat het veel effectiever is je handelsaccount met een paar "asymmetrische trades" te laten groeien dan met het 1:2 model. Traders moeten dus proberen om specialisten te worden in buitengewone kansen.

How to Develop a Profitable Trading Strategy

Why You Should Do the Opposite of What the Majority of Traders are Trying to Do

DAO PRESS How to Develop a Profitable Trading Strategy Why You Should Do the Opposite of What the Majority of Traders are Trying to Do Traders become active in the stock market for no other reason than to collect points, ticks and pips. As much as possible and as fast as possible. Everything else is pastime and useless analysis. Traders therefore need a

method, a system that does exactly that: accumulating small profits permanently, which eventually adds up to a considerable plus in the account. For this to happen, the author takes the classic recommendation "cut your losses and let your profits run" under the magnifying glass. In this book, he does the opposite of this well-meaning advice: keep profits as small as possible and choose losses as great as possible. In the second part of the book, he is investigating a strategy that works with this premise. And the historical backtesting gives him right.
