An Extraordinary Real Life Story of
an Auto-Biographer - Yarlagadda

Xlibris Corporation Life is layers and layers of experiences packed in a secret memory box contained in the cranium. I dug deep into tried to peep at the contents through the prismatic eyes of a narrator. It looked colourful and multidimensional. But the aim of my book was to indicate the quality of human relationships. The second aspect which impressed me most is that destiny is powerful. Luck is a combination of forces.

Women in Science and Technology Confronting Inequalities

Sage Publications Pvt. Limited Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and

Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.
