## **VALUE BASED PERFORMANCE MEASURES**

---

### **THEORETICAL EVALUATION AND EMPIRICAL ANALYSIS OF THEIR APPLICATION AND VALUE RELEVANCE ON A EUROPEAN LEVEL**

---

*Springer Nature* Nils Eikelmann describes the framework conditions for the application of value-based performance measures and critically analyses selected ones. The disclosure of value-based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing information needs of investors. However, companies adapt the developed theoretical concepts of value-based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies. In addition, there is a variety of different metrics from which companies can choose. The empirical study aims to reduce existing research gaps and is divided into three parts: the analysis of annual reports of selected European companies, the calculation of a standardised value-based performance measure and a value relevance study in the form of an association study.

## **PSYCHOLOGY OF CAREER ADAPTABILITY, EMPLOYABILITY AND RESILIENCE**

---

*Springer* This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently. It emphasizes the twin aims of enhancing a persons' career adaptability and helping them to become more employable, rather than linearly trying to find a job and remaining in one organisation for their entire career-lives. The book shows that, to achieve these aims, people need to acquire career resilience, especially since the world of work no longer provides workers with work-holding environments for the duration of their career-lives. It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued, people have managed to use the new technology to create new employment opportunities. Readers from career psychology and management research, vocational and professional career coaching, and students of career psychology will find this book delivers sound, updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities.

## **SUKUK STRUCTURES: LEGAL ENGINEERING UNDER DUTCH LAW**

---

*Eleven International Pub* **Sukuk is the Arabic name for financial certificates. Sukuk securities are structured to comply with Islamic law and its investment principles, which prohibit the charging or paying of interest. This book is the first to set out how sukuk transactions can be structured under Dutch private law and covers the Islamic and Dutch legal issues involved. It explains the fundamentals of Islamic finance and analyzes Islamic contract, property, corporate, and finance law. The book describes how Islamic finance principles, such as riba (in short: prohibition on interest) and gharar (avoidance of contractual uncertainty), have contributed to the development of Islamic finance contracts. It examines the legal structure of sukuk transactions and the applicable Islamic finance rules, and it scrutinizes three main sukuk transactions (the sukuk al-musharaka, the sukuk al-murabaha, and the sukuk al-ijarah) under Dutch private law, mainly focusing on Dutch contract, property, insolvency, and corporate law. The book concludes that there are no legal obstacles to introducing Islamic finance in the Netherlands. Sukuk Structures: Legal Engineering under Dutch Law will be of interest to academics and practitioners in the field of banking and finance law.**

## **NU / NÅ**

## **A FAMILY OF DISCOURSE MARKERS ACROSS THE LANGUAGES OF EUROPE AND BEYOND**

---

*Walter de Gruyter GmbH & Co KG* **This book, situated within the framework of Comparative Interactional Linguistics, explores a family of fourteen discourse markers across the languages of Europe and beyond (Yiddish, Hebrew, Russian, Polish, Romani, Estonian, Finnish, Upper Saxonian and Standard German, Dutch, Icelandic, and Swedish), arguing that they go back to one, possibly two, particles: NU/NÅ. Each chapter analyzes the use of one of the NU/NÅ family members in a particular language, usually on the basis of conversational data, feeding into a comprehensive chapter on the structure, function, and history of these particles. The approach taken in this volume broadens the functional linguistic concept of 'structure' to include the sequential positioning of the particles and their composition, and the concept of 'function' to include the conversational actions performed in interaction. Employing conversation analytic methodology thus enables a study of the ways these particles acquire meaning within certain sequential and action**

environments -- both cross-linguistically and with regard to the grammaticization of the particles. All this sheds light on the borrowing patterns of NU/NÀ across the languages. With contributions by Peter Auer, Galina B. Bolden, Gonen Dori-Hacohen, Andrea Golato, Harrie Mazeland, Auli Hakulinen, Helga Hilmisdóttir, Leelo Keevallik, Hanna Lehti-Eklund, Anna Lindström, Yael Maschler, Yaron Matras, Gertrud Reershemius, Mirja Saari, Lea Sawicki, Marja-Leena Sorjonen, Heidi Vepsäläinen and Matylda Weidner.

---

*Elsevier* Who cheats and why? How do they cheat? What are the consequences? What are the ways of stopping it before it starts? These questions and more are answered in this research based investigation into the nature and circumstances of Academic Cheating. Cheating has always been a problem in academic settings, and with advances in technology (camera cell phones, the internet) and more pressure than ever for students to test well and get into top rated schools, cheating has become epidemic. At the same time, it has been argued, the moral fiber of society as a whole has dampened to find cheating less villainous than it was once regarded. Who cheats? Why do they cheat? and Under what circumstances? Psychology of Academic Cheating looks at personality variables of those likely to cheat, but also the circumstances that make one more likely than not to try cheating. Research on the motivational aspects of cheating, and what research has shown to prevent cheating is discussed across different student populations, ages and settings. methodology of academic cheating including the effect of new technologies Reviews and discusses existing theories and research about the motivation behind academic cheating

### **THE POSSIBILITIES AND LIMITS OF PRIVATE SCHOOLING IN PAKISTAN**

---

*World Bank Publications* **Abstract:** This paper looks at the private schooling sector in Pakistan, a country that is seriously behind schedule in achieving the Millennium Development Goals. Using new data, the authors document the phenomenal rise of the private sector in Pakistan and show that an increasing segment of children enrolled in private schools are from rural areas and from middle-class and poorer families. The key element in their rise is their low fees- the average fee of a rural private school in Pakistan is less than a dime a day (Rs.6). They hire predominantly local, female, and moderately educated teachers who have limited alternative opportunities outside the village. Hiring these teachers at low cost allows the savings to be passed on to parents through low fees. This mechanism- the need to hire

teachers with a certain demographic profile so that salary costs are minimized—defines the possibility of private schools: where they arise, fees are low. It also defines their limits. Private schools are horizontally constrained in that they arise in villages where there is a pool of secondary educated women. They are also vertically constrained in that they are unlikely to cater to the secondary levels in rural areas, at least until there is an increase in the supply of potential teachers with the required skills and educational levels.
