The Seven Worlds

Createspace Independent Publishing Platform After two long years in the void, Will is glad to be home, and so is his family. However he still has his job to do: Feliogustus has favors to pay back after being without Will for so long and some of those favors are coming due. So while having his homecoming interrupted isn't enjoyable, paying back those gods that Feliogustus owes is important. When an opportunity to take on a task on one of the core worlds as a favor to another god comes along, Will must drop everything and deal with it immediately. Will's never been to a core world before, much less heard of them, but to Feliogustus it's important that he goes because invites to the core are few and far between. So while the task may seem to be mundane to Will, he knows from experience that there's more going on than Feliogustus has told him. And anything that's important to Fel, is important to Will. When Will gets there he finds that some of the 'rules' that the gods play by are different in the core, as well as some of the rules that govern the infinite and the portals that link it together. Will finds that instead of one realm, the place he's now in is made up of multiple realms linked together by portals that not only most people can see, but which are in fact big enough to sail both trading and warships through.

Transition, Infinity, and Ecstasy

Partridge Publishing Though modern astronomers and astro-phycisists like Stephen Hawking have their doubts about interstellar travel there are countless references to inter-dimesional travel in mostly ancient Indian texts: The 'Kandha Puranam' (nearly 17 million years ago)mentions that the Asura (Titan) King 'Sooran' ruled over 1008 universes and had 'vimanas' or flying crafts that could in an instant travel all over space cutting across dimensions at tremendous speed,that could hover in mid-air,over water,disappear and re-appear all of a sudden and had a host of stealth-weapons,even 'nuclear-winter' is mentioned for it is said that the entire world was enveloped in darkness caused by Sooran during the war; Lord Muruga possessed the 'Peacock Craft' that could circumvent the '14 worlds' and fly beyond in a micro-second and his "missile with the lengthy flame"(nedunchudar Vel) was 'voice-activated' and re-useable and was so powerful that it blew up into smitherns the 'Kraunja' mountain which even our modern day nuclear weapons cannot do according to scientists; The Ramayana(1.7 million years ago) mentions that Emperor Ravana's 'Pushpaka vimana' which he captured from 'Kubera' the Lord of riches in heaven could host "as many passengers as it takes",there were stun-weapons and stealth-technology; In the Mahabharata war(3500 b.c.) nuclear weapons like the 'brahmastra' were used and there is mention of numerous flying crafts of the Lords (Angels) of Asuras (Titans) and Rakshasas (Demons) who all travelled to and fro from the upper and lower worlds; The 'Sri Linga Purana' mentions that Lord Brahma's 'Swan Craft' flew and transcended the seven upper worlds while Lord Vishnu's 'Boar Craft' 'tunnelled' though the seven lower worlds and went even beyond 'Baathala' the lowest plane which all reminds us of blackholes being portals and shortcuts to parallell universes which is being theoretically proved today!; More than 2500 years ago the Japanese Royal Family's ancestors met with the 'Sun God' who landed on Mount Fuji and were presented with a sword and an orb which are still in the Imperial Palace in Japan; The native Indian's forefathers living on 'sun Island' on lake Titicaca in South America were visited by the Sun God; The Dogon tribes of Mali have a tradition that their forefathers had sailed on a great ship that flew down from Sirius the star,but what is interesting is that they don spacesuit-like gear and celebrate their home-coming once every fifty two years which is when sirius comes in direct alignment with our world!

Indic, Iranian, Semitic, and Hellenic Up to C. 600 B.C.

Munshirm Manoharlal Pub Pvt Limited The Current Accounts Of The History Of Civilization Do Not Generally Appear To Give Adequate Importance To Non-Western Civilizations. Works Like Needham'S Science And Civilization In China Are Rare. The Accounts Of Indic Civilization On The Other Hand Have Either Neglected The Factor Of Civilizational Contacts Or Represented Them In An Inadequate Manner. Few Serious Attempts Have Been Made To Gain An Insight Into Human Civilization Through The Comparative Historical And Integrated Studies In All Its Aspects. Historical Research Necessarily Tied To The Study Of The Source Material Is Still In The Process Of Rising To The Level Of Universal History. The Present Volume, Is Intended To Review The History Of Science, Philosophy And Culture In Indian Civilization In The Context Of Civilizational Contacts With Iranian, Semitic And Hellenic Worlds And Comparable Developments In Them. The Volume Is Divided Into Four Sections: Proto-Historic People And Language, Social And Technological Foundations Of Civilization, The Most Ancient Indian Religious Traditions And Birth And Rise Of Science And Philosophy. The Focus Of The Present Volume Is On Science, Philosophy And Culture, And Not On Political History Or Merely Regional And Epochal Developments. It Is Not Intended To Give In This Volume A General History Of Civilizations Between India And Mediterranean World But Is Intended To Highlight How Contributions Were Made To The Common Human Quest Of Truth, Goodness And Beauty Under Varying Conditions And Wide Ranging Contacts.

Eon

Tor Books New York Times bestselling author Greg Bear's Eon is now available for the first time in trade paperback. The 21st century was on the brink of nuclear confrontation when the 300 kilometer-long stone flashed out of nothingness and into Earth's orbit. NASA, NATO, and the UN sent explorers to the asteroid's surface...and discovered marvels and mysteries to drive researchers mad. For the Stone was from space--but perhaps not our space; it came from the future--but perhaps not our future; and within the hollowed asteroid was Thistledown. The remains of a vanished civilization. A human-English, Russian, and Chinese-speaking-civilization. Seven vast chambers containing forests, lakes, rivers, hanging cities... And museums describing the Death; the catastrophic war that was about to occur; the horror and the long winter that would follow. But while scientists and politicians bickered about how to use the information to stop the Death, the Stone yielded a secret that made even Earth's survival pale into insignificance.

Pagan Portals - The Hedge Druid's Craft

An Introduction to Walking Between the Worlds of Wicca, Witchcraft and Druidry

John Hunt Publishing The Hedge Druid's Craft blends the traditions of Wicca, Witchcraft and Druidry into a spiritual path that uses the techniques of "hedge riding" to travel between the worlds, bringing back wisdom and enchantment into our everyday lives. It is about working with boundaries, with a foot in either world, living around the edges and working with liminal times and places. For those whose paths meander and often overlap, and those who would not be constrained nor confined by labels, yet who seek some definition, this book is for you. If you are interested in Witchcraft, Wicca or Druidry, this book will sing to your soul.

Between

WestBow Press Brilliant young New Zealand physicist, Dr. Brandon Maine, is unexpectedly engulfed by an unknown family history in German colonial East Africa. Lured by the mysterious Rachel, his exploratory visit morphs into chaos when he stumbles across unlikely friends whose discovery of an enormous uranium field threatens them all. In the midst of gathering evil, Bran is swept into the vortex of an Africa he never knew existed—a world of the supernatural and atrocities that have shackled the continent for generations and almost destroy him. Drawing from these ancient unseen powers, rapacious politician Gabriel Iramo will stop at nothing—including genocide—to gain control of the country and plunge a continent back into the old ways. The shocking discovery that there is no safe middle ground shatters Bran's laissez-faire approach to life while holding the clue to Africa's revival. But to live the adventure and be true to its demands will take all that he has and alter the course of nations.

Tourniquet

iUniverse Your father's murdered in his office, a girl has been kidnapped, her voice box removed, drowning every time you're forced to complete another job for her psychotic abductors, or she's starving, her soulless captors refusing to feed her, she's shivering in a freezer somewhere, left to congeal, or she's burning in a tin box, under the sun, boiling like a skinned chicken, trapped and waiting, always waiting. Her life is perpetually at stake. She's incentive; she's a reason to obey. She's not even human anymore. She's a breathing obligation. She's your best friend's sister and you think you love her, but you don't understand the word love, because all you can feel, all you can sense, is antipathy lingering around your lifeless, yet animated cadaver, a slave to misanthropists, a confused fragile frame, caught between conflicting philosophies of freedom and despair. She's lost her liberty, you've lost your mind, and her brother, your best friend, has lost his ability to rationalize. Tourniquet, a morbid love story of freewill, responsibility, suffering, and anguish, a world where nothing matters, a world where everything is at stake, a hopeless, desolate world where everybody's missing something, and human tenderness festers on the crushed wings of houseflies.

Startup Asia

Top Strategies for Cashing in on Asia's Innovation Boom

John Wiley & Sons Find out where the new innovation hot spots are, what the next consumer waves will be, and where to catch them Asia's innovation hot spots are fast emerging as first-choice destinations for bright, young entrepreneurs. From Taiwan to Singapore, technology center hubs are forming to rival the original Silicon Valley. Startup Asia gives you a close-up view into the key growth trends shaping entrepreneurship in China and India, plus the new frontier market of Vietnam. Showing how entrepreneurs and investors can start up in Asia and go global, the book provides a first-hand, on-the-ground tour of the new technology centers that are gaining momentum all over Asia. Interviews with the most successful venture capitalists and entrepreneurs reveal their winning strategies and show how a new generation of entrepreneurs in China and India are no longer looking to the West for their cues—but are instead crafting their own local business models and success strategies. Shows entrepreneurs and investors how they can pursue their dreams of launching successful start-ups in Asia Reveals that many of the same venture investors that first funded young businesses in Silicon Valley moved into China, then India, and are now finding their way to Vietnam Addresses the risks of doing business in Asia's developing markets, including lack of intellectual property protection, political and regulatory shifts, bribery, and corruption From high-profile Forbes contributor Rebecca Fannin, Startup Asia is the essential guide for anyone looking to trek into this new frontier.

A New Tree of Life for Planetary Ascension

Light Technology Publishing ÿDavid K. Miller has teamed up with Torah scholar and Kabbalist expert Mordechai Yashin, who resides in Jerusalem, Israel, to bring you *A New Tree of Life for Planetary Ascension*, which is based on unique lectures and classes David and Mordechai gave over an eight-month period between 2012 and 2013. It functions as a manual explaining the Kabbalistic Tree of Life and the Arcturian Planetary Tree of Life, which is an expansion of the concepts contained in the Kabbalistic tree. The idea behind the Arcturian Planetary Tree of Life is to demonstrate through a paradigm shift how planetary energies can be used to rebalance our planet. The basic assumption is that Earth is currently unbalanced due to a variety of factors, including environmental contamination, global warming, and usage and extinctions of forests and ocean life on a mass basis. It must be pointed out that David has been working with the Arcturians to further upgrade the Planetary Tree of Life. This upgrade includes one completely new sphere that relates to the ascension and to the fifth dimension. This new sphere will be described in detail to explain how to use the new energy. Includes: Great pictorial descriptions of the Hebrew letters Detailed Kabbalistic map and paradigm of the Tree of Life Hebrew terminology and numbers relating to the Tree of Life Featured channelings through David K. The Sacred & the Digital

Critical Depictions of Religions in Video Games

MDPI Video game studies are a relative young but flourishing academic discipline. But within game studies, however, the perspective of religion and spirituality is rather neglected, both by game scholars and religion scholars. While religion can take different shapes in digital games, ranging from material and referential to reflexive and ritual, it is not necessarily true that game developers depict their in-game religions in a positive, confirming way, but ever so often games approach the topic critically and disavowingly. The religion criticisms found in video games can be categorized as follows: religion as (1) fraud, aimed to manipulate the uneducated, as (2) blind obedience towards an invisible but ultimately non-existing deity/ies, as (3) violence against those who do not share the same set of religious rules, as (4) madness, a deranged alternative for logical reasoning, and as (5) suppression in the hands of the powerful elite to dominate and subdue the masses into submission and obedience. The critical depictions of religion in video games by their developers is the focus of this special issue.

The Paradoxical Ascent to God

The Kabbalistic Theosophy of Habad Hasidism

State University of New York Press This book is a study of the Habad Hasidism movement, an influential part of the Hasidic Movement, which originated in the eighteenth century. Habad was founded by Rabbi Shneur Zalman of Liadi (1745-1813) who established a Hasidic community in Belorussia and who set forth the new Habad doctrine in a book entitled Tanya (Likutey Amarim). This doctrine expounded the mystical ideas underlying the quest for God. Its essential innovation lay in the formulation of a religious outlook which concentrated upon perceiving the divinity: its essence, its nature, the stages of its manifestation, its characteristics, its perfection, its differing wills, its processes, the significance of its revelation and the possibilities of its perception. This conception generated a profound transformation of religious worship and was the cause of great controversy throughout the Jewish world. Rachel Elijor is Professor in the Department of Jewish Studies at Hebrew University.

The Hammer Commission

CreateSpace Mark's job seems pretty dull, working as an investigator into crimes committed against Church property, theft of holy objects, vandalism; nothing terribly exciting but he does get to travel the world. That's just the window dressing. Mark does work for the Church, but as an elite member of a thousand year old secret society that hunts down devils, demons, and other evils. His job is not just to find them, but to remove, dispel, or kill them: he's on the front lines of the secret ongoing war between Heaven and Hell. However as wars go, it has been a fairly easy one for the last few decades, with nothing seriously evil having been summoned since the last world war. But all of that is about to change, and the question for Mark may not be can he survive, but can he survive long enough.

A Treatise on the Seven Rays: Esoteric healing

An Infinity of Little Hours

Five Young Men and Their Trial of Faith in the Western World's Most Austere Monastic Order

Hachette UK In 1960, five young men arrived at the imposing gates of Parkminster, the largest center of the most rigorous and ascetic monastic order in the Western world: the Carthusians. This is the story of their five-year journey into a society virtually unchanged in its behavior and lifestyle since its foundation in 1084. *An Infinity of Little Hours* is a uniquely intimate portrait of the customs and practices of a monastic order almost entirely unknown until now. It is also a drama of the men's struggle as they avoid the 1960s -- the decade of hedonism, music, fashion, and amorality -- and enter an entirely different era and a spiritual world of their own making. After five years each must face a choice: to make "solemn profession" and never leave Parkminster; or to turn his back on his life's ambition to find God in solitude. A remarkable investigative work, the book combines first-hand testimony with unique source material to describe the Carthusian life. And in the final chapter, which recounts a reunion forty years after the events described elsewhere in the book, Nancy Klein Maguire reveals which of the five succeeded in their quest, and which did not.

God's Own

The Genesis of Mathematical Story-Telling: Niward Story of Nkechi Madonna Adeleine Agwu, PH.D

Createspace Independent Publishing Platform In the beginning God created woman in His own like image, blessed her to go out to be fruitful and multiply, to replenish the earth, subdue it, and have dominion over everything on it, Genesis 1: 27-28. *God's Own: The Genesis of Mathematical Story-Telling* is about the creativity of God (The Absolute Infinite) as He is reflected in women. It is about the power of The Absolute Infinite to perform signs and wonders reflected in mathematical symbols, patterns, numbers, and graphs. It is a book on His word according to John 1:1, in the beginning was the word, the word was with God, and the word was God. *God's Own: The Genesis of Mathematical Story-Telling* is a mathematical, cultural, and spiritual story of Dr. Nkechi (God's own) Madonna Adeleine Agwu, aka Nma (Beautiful) Jacob. Dr. Agwu is an African female leader in mathematics and statistics education. Her life trajectory includes experiences of displacement, homelessness, living in refugee camps, single-parenting of a child with hearing and speech needs, and many other issues that from all indications could have set her up for failure, but for God's divine intervention. *God's Own: The Genesis of Mathematical Story-Telling* is about Dr. Agwu's journey as an ethno-mathematician to her present scholarship in African culture and women's stories in science, technology, engineering, and mathematics (STEM) related fields. It is about how she found her identity as a mathematical story-teller of members of the Organization of Nigerian Women in Agricultural Research and Development (NiWARD). It is a story about the beauty, strength, courage, and nurturing spirit of women. In this era of globalization, African people face the urgent need to foster world-wide education about their

mathematics, science, technology, history and culture (Gerdes, 1998). All groups of people have made significant contributions to the development of mathematics. However, the contributions of Africans other than those related to the early beginnings of algebra and geometry in ancient Egypt, are still highly unacknowledged in the history of mathematics (Lumpkin, 1997). This is partly due to our oral traditions, slavery, colonialism, neo-colonialism, globalization, and the fact that our indigenous mathematics, scientific and technological knowledge as a people is often shrouded in our spirituality. This notwithstanding, efforts must be made to document the mathematical contributions of Africans to enrich the curriculum in a multicultural and interdisciplinary way by providing a wide repertoire of examples of mathematical concepts illustrated from the African context. *God's Own: The Genesis of Mathematical Story-Telling* does this. In particular, it highlights the indigenous mathematical knowledge and cultural beauty of the Ndebele people of Southern Africa. *God's Own: The Genesis of Mathematical Story-Telling* is a story about creativity, innovation, and adaptation. It is a story about necessity as the mother of innovation. It is about the philosophy of "do what you can, from where you are, with what you have." It is a story about Nma (Beautiful) Jacob, the survivor, overcomer, successor and faithful servant of God. It is a story that The Absolute Infinite is ever present in our lives shaping our mathematical genomes. Emmanuel - God is with us! His Angels are around us, protecting and guiding us!

House of Leaves

The Remastered, Full-Color Edition

Pantheon "A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

The Proposal Game

Detan Honding and his best friend Tibs turn up on the streets of the desert city of Aransa with a dire problem: they have forgotten to get Detan's aunt a birthday present. It wouldn't be such a big deal, but his aunt is the matriarch of the family and controls his purse strings. She's cut him off, and his counterfeit coin will only get him so far. Desperate to get back in his aunt's good graces, Detan seeks a gift that money can't buy, but sharp wits just might be able to steal away. He sets his sights on the well-to-do family Erst, but little does he know the daughter of the household has found a perfect tool in Detan for her own plans.

Shard & Shield

Aeclipse Press He can save her life—if he sacrifices those he swore to protect. When the artifact intended to end an interdimensional war is damaged, a mage is trapped on the other side of the rift with her servant—and only bastard soldier Shianan knows the cheery young boy with her is really one of the monstrous enemy, disguised as a human. Ariana is one of Shianan's few friends, but rescue requires treason and betraying his people to attack. State mage Ariana struggles as a prisoner of war in a world of deadly magic and unfamiliar customs. Her only ally is her former servant, once again a renowned warrior caught up in political machinations. To survive, he'll have to renew the fight against Ariana's world. As their people's wasted armies brace for fresh battle, bastard, mage, and monster must set aside prejudices and rivalries to find an end to centuries of conflict, before they die as traitors. Reviews say: "Shard & Shield is one of the most character-driven fantasy novels I've ever read, and I mean that in the best way." "...a gripping fantasy tale and characters that I've come to care for who face complex situations that don't have easy answers. A great read!" This new epic fantasy series by an award-winning author is recommended for fans of Patrick Rothfuss, Brandon Sanderson, and Brent Weeks.

The Uninhabitable Earth

A Story of the Future

Penguin UK **SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live—the planet no longer nurturing a dream of abundance, but a living nightmare.

The Flat Earth as Key to Decrypt the Book of Enoch

Lulu.com Shortly after accepting the flat earth as a model for the world, I decided to revisit the Book of the Courses of the Heavenly Luminaries to see if my new understanding would somehow mirror what Enoch was sharing as a motion for the sun and moon. As I began to read chapters 71-82, I found to my utter amazement that I was able to grasp those passages. I knew then that the vision that the angel

Uriel had shown to Enoch could only be deciphered if one were to imagine Enoch's description of the revolution of the sun and the moon. As seen from above the flat circular plane of the earth as described by Isaiah; and that Enoch must have been taken up to perhaps where Polaris is, centered directly above the North Pole, and while looking down at the backdrop of the earth, was instructed on the motions of both the sun and moon. Without such conception, it is in my opinion impossible to apply these descriptions to the model of the earth as a spherical planet.
