A History of Fort Worth in Black & White 165 Years of African-American Life University of North Texas Press *A History of Fort Worth in Black & White fills a long-empty niche on the Fort Worth bookshelf: a scholarly history of the city's black community that starts at the beginning with Ripley Arnold and the early settlers, and comes down to today with our current battles over education, housing, and representation in city affairs. The book's sidebars on some noted and some not-so-noted African Americans make it appealing as a school text as well as a book for the general reader. Using a wealth of primary sources, Richard Selcer dispels several enduring myths, for instance the mistaken belief that Camp Bowie trained only white soldiers, and the spurious claim that Fort Worth managed to avoid the racial violence that plagued other American cities in the twentieth century. Selcer arrives at some surprisingly frank conclusions that will challenge current politically correct notions.*

Les troubles liés aux événements traumatiques. Guide des meilleures pratiques pour une clientèle complexe Guide des meilleures pratiques pour une clientèle complexe Presses de l'Université Laval *Au Canada, la majorité (76 %) de la population vivra un événement traumatique au cours de sa vie. Même si la plupart des personnes arrivent à s'adapter à un tel événement, près de 10 % développeront un trouble de stress post-traumatique (TSPT). Ce nombre peut tripler, voire quadrupler dans les populations plus à risque, comme les militaires, les victimes d'agressions sexuelles et les individus gravement blessés. Outre le TSPT, plusieurs troubles peuvent apparaître à la suite d'un trauma, soit une humeur dépressive, de l'insomnie et des cauchemars, une consommation inappropriée d'alcool ou de drogue, pour ne nommer que ceux-ci. En somme, les cliniciens sont souvent démunis face à cette clientèle des plus complexes. Cet ouvrage est le premier en français à présenter les meilleures pratiques dans l'évaluation et le traitement du TSPT et des troubles connexes, dans un langage accessible aux cliniciens. Ancré rigoureusement à la fois dans la*

Il pourra aussi être utilisé auprès des futurs intervenants afin de parfaire leur formation concernant l'évaluation et l'intervention auprès des victimes de trauma. **State of University Education in Tanzania 2018 Handbook of Research on Expanding Business Opportunities With Information Systems and Analytics IGI Global** Recent advancements in data collection will affect all aspects of businesses, improving and bringing complexity to management and demanding integration of all resources, principles, and processes. This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia. It reveals how environmental organizations such as Greenpeace, Friends of the Earth, WWF and others have fought fiercely to stop deforestation in the region. It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world-economy. It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia. The author analyses how globalization has led to the expansion of international commodity chains in the region, particularly for mineral ores, soybeans and beef. He shows how environmental organizations have politicized these commodity chains as weapons of conservation, through boycotting certain products, while other pro-development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources. **The Routledge Research Companion to Energy Geographies Routledge** Energy has become a central concern of many strands of geographical inquiry, from global climate change to the effects of energy decisions on our lives. However, many aspects of the 'black box' of relationships at the energy-society interface remain unopened, especially in terms of the spatial underpinnings of energy production and consumption within nations, cities and regions. Debates focusing on the location and nature of energy flows frequently fail to consider the multiple geographical networks that illustrate and explain the distribution of fuels and services around the world. Providing an integrated perspective on the complex interdependencies between energy and geography, *The Routledge Research Companion to Energy Geographies* offers a timely conceptual framework to study the multiple facets of energy geography, including security, space and place, planning, environmental science, economics and political science. Illustrating how a geographic approach towards energy can aid decision-making pathways in the domains of social justice and environment, this book provides insights that will help move the international community toward greater cooperation, stability, and sustainability. **Quarterly Review of Distance Education Volume 20 #4 IAP** The *Quarterly Review of Distance Education* is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. Official Airline Guide World wide edition Lightning Protection Guide Paulo Freire: Relevance to Indian Teacher Education Lulu.com Research Universities in Africa African Minds From the early 2000s, a new discourse emerged, in Africa and the international donor community, that higher education was important for development in Africa. Within this 'zeitgeist' of converging interests, a range of agencies agreed that a different, collaborative approach to linking higher education to development was necessary. This led to the establishment of the Higher Education Research and Advocacy Network in Africa (Herana) to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa. This book is the final publication to emerge from the Herana project. The project has also published more than 100 articles, chapters, reports, manuals and datasets, and many presentations have been delivered to share insights gained from the work done by Herana. Given its prolific dissemination, it seems reasonable to ask whether this fourth and final publication will offer the reader anything new. This book is certainly different from previous publications in several respects. First, it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project. Second, previous books and reports were published mid-project. This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large-scale project. For the first time, some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees. Different does not necessarily mean new. An emphasis on the 'newness' of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor-funded project. Rather, each chapter in this book brings, to a lesser or greater extent, something new to our understanding of universities, research and development in Africa.
