Hustle Harder, Hustle Smarter

HarperCollins NEW YORK TIMES BESTSELLER For the first time, Curtis “50 Cent” Jackson opens up about his amazing comeback—from tragic personal loss to thriving businessman and cable’s highest-paid executive—in this unique self-help guide, his first since his blockbuster New York Times bestseller *The 50th Law*. In his early twenties Curtis Jackson, known as 50 Cent rose to the heights of fame and power in the cutthroat music business. A decade ago the multi-platinum selling rap artist decided to pivot. His ability to adapt to change was demonstrated when he became the executive producer and star of *Power*, a high-octane, gripping crime drama centered around a drug kingpin’s family. The series quickly became “appointment” television, leading to Jackson inking a four-year, \$150 million contract with the Starz network—the most lucrative deal in premium cable history. Now, in his most personal book, Jackson shakes up the self-help category with his unique, cutting-edge lessons and hard-earned advice on embracing change. Where *The 50th Law* tells readers “fear nothing and you shall succeed,” *Hustle Harder, Hustle Smarter* builds on this message, combining it with Jackson’s street smarts and hard-learned corporate savvy to help readers successfully achieve their own comeback—and to learn to flow with the changes that disrupt their own lives.

Pop Empires

Transnational and Diasporic Flows of India and Korea

University of Hawaii Press At the start of the twenty-first century challenges to the global hegemony of U.S. culture are more apparent than ever. Two of the contenders vying for the hearts, minds, bandwidths, and pocketbooks of the world’s consumers of culture (principally, popular culture) are India and South Korea. “Bollywood” and “Hallyu” are increasingly competing with “Hollywood”—either replacing it or filling a void in places where it never held sway. This critical multidisciplinary anthology places the mediascapes of India (the site of Bollywood), South Korea (fountainhead of Hallyu, aka the Korean Wave), and the United States (the site of Hollywood) in comparative dialogue to explore the transnational flows of technology, capital, and labor. It asks what sorts of political and economic shifts have occurred to make India and South Korea important alternative nodes of techno-cultural production,

consumption, and contestation. By adopting comparative perspectives and mobile methodologies and linking popular culture to the industries that produce it as well as the industries it supports, Pop Empires connects films, music, television serials, stardom, and fandom to nation-building, diasporic identity formation, and transnational capital and labor. Additionally, via the juxtaposition of Bollywood and Hallyu, as not only synecdoches of national affiliation but also discursive case studies, the contributors examine how popular culture intersects with race, gender, and empire in relation to the global movement of peoples, goods, and ideas.

Hustle and Float

Reclaim Your Creativity and Thrive in a World Obsessed with Work

Diversion Books OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

The Cuban Hustle

Culture, Politics, Everyday Life

Duke University Press In The Cuban Hustle, Sujatha Fernandes explores the multitudinous ways artists, activists, and ordinary Cubans have hustled to survive and express themselves in the aftermath of the Soviet Union's collapse. Whether circulating information on flash drives as a substitute for the internet or building homemade antennas to listen to Miami's hip hop radio stations, Cubans improvise alternative strategies and workarounds to contend with ongoing isolation. Throughout these essays, Fernandes examines the emergence of dynamic youth cultures and social movements as Cuba grappled with economic collapse, new digital

technologies, the normalization of diplomatic ties with the United States during the Obama administration, and the regression of US-Cuban relations in the Trump era. From reflections on feminism, new Cuban cinema, and public art to urban slums, the Afro-Cuban movement, and rumba and hip hop, Fernandes reveals Cuba to be a world of vibrant cultures grounded in an ethos of invention and everyday hustle.

New Thoughts on the Black Arts Movement

*Rutgers University Press During the 1960s and 1970s, a cadre of poets, playwrights, visual artists, musicians, and other visionaries came together to create a renaissance in African American literature and art. This charged chapter in the history of African American culture—which came to be known as the Black Arts Movement—has remained largely neglected by subsequent generations of critics. *New Thoughts on the Black Arts Movement* includes essays that reexamine well-known figures such as Amiri Baraka, Larry Neal, Gwendolyn Brooks, Sonia Sanchez, Betye Saar, Jeff Donaldson, and Haki Madhubuti. In addition, the anthology expands the scope of the movement by offering essays that explore the racial and sexual politics of the era, links with other period cultural movements, the arts in prison, the role of Black colleges and universities, gender politics and the rise of feminism, color fetishism, photography, music, and more. An invigorating look at a movement that has long begged for reexamination, this collection lucidly interprets the complex debates that surround this tumultuous era and demonstrates that the celebration of this movement need not be separated from its critique.*

Return of the Hustle

The Art of Marketing With Music

Springer Has a commercial ever brought you to tears? Has a movie ever inspired you so much you change your way of life? Has the series finale of a television show ever broken your heart? Has a video game ever altered your perception of reality? If you're like most consumers, you answered 'yes' to at least one of those questions. Whether you remember it or not, the music of that ad, film, show or game probably played a big role in influencing your emotional response during that experience. In fact, music is included in media specifically for the purpose of connecting with audiences on a deeper level that visuals alone cannot access. A strong music strategy is fundamental to the success of television, film, brands and video games. Because of higher expectations for audiovisual content, it will take more than clever animation or a celebrity cameo to connect with consumers in an authentic, organic way. By providing audiences with a genuine music experience, whether with an exclusive song through an artist partnership or by featuring new music from an emerging band, you can build a bond that extends far beyond product experience. Music touches us emotionally in a way that words seldom do. We feel it - we remember it. In Return of The Hustle, a leading music and marketing industry insider discusses the diverse audio touchpoints for four key industries and shows how marketers, storytellers, and advertisers can use music to effectively guide audiences along the customer journey from passive consumers to brand advocates. Return of The Hustle provides readers with a blueprint for music strategy that professionals at any level in any industry can use to attract consumers, immerse them into the content, and extend relationships between them and the brand long after the commercial ends or the credits roll. With detailed case studies, exhaustive interviews, and thorough research, Return of the Hustle gives readers the playbook to use the marketing power of music to drive business results.

The New Art Examiner

Station Identification

Confessions of a Video Kid

Untreed Reads This is a memoir by a thirty-one-year-old man who has just given up the most meaningful, heartwarming and enduring relationship in his life—his television set. The tale begins with Donald Bowie's discovery of Howdy Doody, and ends as he bids farewell to television after the last episode of the Mary Tyler Moore Show. In the span of Donald's young life, he trades reality for the better life on the tube. TV becomes Donald's family, his friends, his classroom and, ultimately, his undoing. Station Identification is his hilarious confession of that beautiful friendship. Grappling with the urges of puberty, he finds that "the whole business of womanhood seemed easiest to understand when it was jammed into Elly May Clampett's jeans." Years later, after a wonderful night on the town, Donald brings his date home to watch TV—something close to having her meet the folks. "She fell asleep during a rerun of The Honeymooners," he writes. "I knew the relationship wouldn't last." Time takes its toll on Donald Bowie and television. Hoping to recapture the ecstasy of Howdy Doody, he watches Sesame Street, "Something about the Sesame Street gang suggested that after the show they have white wine in stemware from Bloomingdale's. Buffalo Bob always drank milk out of jelly glasses. He was one of us." This becomes the beginning of the end. If television was once believed to be a vast wasteland, Donald Bowie has come back to tell us that it is a place where dreams are born. PRAISE FOR STATION IDENTIFICATION "I think this is a splendid book. What the river was for Huckleberry Finn, television was for Donald Bowie. Station Identification is in the tradition of Great American Humor." Frederick Exley, author, A Fan's Notes "We're all so tired of this business of blaming all human woe on television. Bowie knows how to look back on his own energetically young life and see what it was that really happened to him, sitting all by himself in front of that warm tube. This book has gems within gems within gems. Bowie is so funny I keep feeling like crying. Alas and amen! Only laughter can save us." Mark Harris, author Bang the Drum Slowly, The Southpaw, and It Looked Like For Ever

The Reluctant Film Art of Woody Allen

University Press of Kentucky For three decades, no American filmmaker has been as prolific -- or as paradoxical -- as Woody Allen. From Play It Again, Sam (1972) through Celebrity (1998) and Sweet and Lowdown (1999), Allen has produced an average of one film a year, yet in many of these films Allen reveals a progressively

skeptical attitude toward both the value of art and the cultural contributions of artists. In examining Allen's filmmaking career, The Reluctant Film Art of Woody Allen demonstrates that his movies often question whether the projected illusions of magicians/artists benefit audience or artists. Other Allen films dramatize the opposed conviction that the consoling, life-redeeming illusions of art are the best solution humanity has devised to the existential dilemma of being a death-foreseeing animal. Peter Bailey demonstrates how Allen's films repeatedly revisit and reconfigure this tension between image and reality, art and life, fabrication and factuality, with each film reaching provisional resolutions that a subsequent movie will revise. Merging criticism and biography, Bailey identifies Allen's ambivalent views of the artistic enterprise as a key to understanding his entire filmmaking career. Because of its focus upon filmmaker Sandy Bates's conflict between entertaining audiences and confronting them with bleak human actualities, Stardust Memories is a central focus of the book. Bailey's examination of Allen's art/life dialectic also draws from the off screen drama of Allen's very public separation from Mia Farrow, and the book accordingly construes such post-scandal films as Bullets Over Broadway and Mighty Aphrodite as Allen's oblique cinematic responses to that tabloid tempest. By illuminating the thematic conflict at the heart of Allen's work, Bailey seeks not only to clarify the aesthetic designs of individual Allen films but to demonstrate how his oeuvre enacts an ongoing debate the screenwriter/director has been conducting with himself between creating cinematic narratives affirming the saving powers of the human imagination and making films acknowledging the irresolvably dark truths of the human condition.

How to Hustle and Win

A Survival Guide for the Ghetto, Part 1

Supreme Design Publishing Likened to a 48 Laws of Power for young Black men, this book presents Black biographies, history, and current events in a language that the Hip-Hop generation will understand and relate to. Each story or essay is framed within the context of a life lesson, each one being of vital importance to the survival, redemption, and ultimate success of our dying Black generation. Both the positive and negative sides of the Black experience are explored in detail, from the lives of infamous drug dealers and pimps to the exploits of Black revolutionaries and activists. In addition, several How To sections outline simple strategies for self-development. Packed with useful information, from the best way to handle confrontations with police, to the continuing relevance of the 1919 race riots, this book has been compared to an urban Encyclopedia Africana. Others have called it a Blueprint for Black Power for a generation struggling with materialism and short

attention spans. This book is guaranteed to change the world by changing the way millions of people think and live. In *How to Hustle and Win*, author Supreme Understanding tells, in often graphic detail, stories like that of the infamous Philadelphia Black Mafia, Harlem's heroin kingpin Frank Lucas, and former gang leader Stanley "Tookie" Williams. In between and throughout these tales, he weaves life lessons and guidance, turning sordid stories of crime and urban despair into an educational experience. Whereas Robert Greene's bestselling *48 Laws of Power* used iconic figures from classical history to illustrate the guidelines for personal success, *How to Hustle and Win* is filled with the exploits of rappers, gangsters, radicals, and revolutionaries. This is a new kind of Black history book, and its intent is the motivation and achievement of a new kind of reader. Although today's literary market has seen an influx of self-help books attending to a variety of issues, few books have attempted to address the concerns of young Black men, struggling to find direction. It is this group that author Supreme Understanding names as one of most troubled demographics in American society today. On the book's website, the author comments: "Unfortunately, few authors actively target this audience, and those who do are either not speaking their language, or not interested in pushing for change. This is why *How to Hustle and Win* was written. This book will change the minds of millions of young men of color, and by doing this, it will ultimately change the world." Revolutionary aspirations aside, *How to Hustle and Win*'s groundbreaking concept results in a truly appealing work. Its essays are delivered in short bursts, none of them over four pages long, making it ideal for struggling readers and those with shorter attention spans. At the same time, the book is filled with a wealth of information that would enlighten educated readers equally. In fact, the author juxtaposes his own personal tales of early delinquency and misdirection with his later years of professional success, including obtaining a doctorate in education at the age of 26.

To Hell with the Hustle

Reclaiming Your Life in an Overworked, Overspent, and Overconnected World

Thomas Nelson In a society where hustle is the expectation, busyness is the norm, and constant information is king, we've forgotten the fundamentals that make us human, anchor our lives, and provide meaning. Jefferson Bethke, New York Times bestselling author and popular YouTuber, has lived the hustle and knows we must stop doing and start becoming. Our culture makes constant demands of us: Do more. Accomplish more. Buy more. Post more. Be more. In following these demands, we have indeed become more: More anxious. More tired. More hurt. More depressed. More frantic. But it doesn't have to be that way. To Hell with the Hustle is your wake-up call to slow down and reclaim your life in an overworked, overspent, and

overconnected world. Not Just in Sickness But Also in Health

Moving Beyond Sickcare to Health Optimization for All

Forbesbooks MAKE A VOW TO GOOD HEALTH How much time each year do you spend interacting with a doctor, pharmacist, or other clinician? Not much, right? In fact, a vast majority of people spend less than 1 percent of their time--usually far less--in clinical settings or interactions. Furthermore, clinical care affects only 30 percent of our overall health status, so why do we fail to acknowledge the drivers of the other 70 percent? We deserve a healthcare system that systematically supports our daily living needs where we spend over 99 percent of our time as a complement to clinical care. It is our daily living activities related to such things as nutrition, fitness, resiliency, sleep, relationships, finances, and purpose--as impacted by social determinants--that make up the vast majority of what determines our total well-being. Not Just in Sickness but Also in Health details how we can create the next generation of benefit plans, including an intelligent ecosystem of personalized resources, capable of supporting how each person can achieve and sustain their optimal health. Drawing on his decades of experience, Margolis explains how existing healthcare industry players, government policymakers, and technology companies can enact a systematic healthcare consumer-centric approach to accomplish these aims, and move the United States and the world from a system of sickcare to one of health optimization for all.

Don't Knock the Hustle

Young Creatives, Tech Ingenuity, and the Making of a New Innovation Economy

Beacon Press Offers a timely analysis of the sheer ingenuity and persistence of young people who cobble together the resources they need to pursue the lives and careers they want. Young adults are coming of age at a time when work is temporary, underpaid, incommensurate with their education, or downright

unsatisfying. Despite these challenges, media scholar S. Craig Watkins argues that this moment of precarity is rife with opportunities for innovation, and that young adults are leading the charge in turning that into an inventive and surprisingly sustainable future. As a result, society is expanding its understanding of who we think of as innovators and what qualifies as innovation, while wealth is spreading beyond traditional corridors of powerful tech companies, venture capitalism, and well-endowed universities. Drawing on over ten years of interviews and data, Watkins reveals the radical ways in which this community of ambitious young creatives is transforming businesses from the outside in. Diverse perspectives that are often ignored or silenced by major corporations are garnering public attention as women and people of color are redefining industries across the globe—all from their computer screens. We meet people like Prince Harvey, a New York-based hip-hop artist who recorded his album entirely on an Apple showroom laptop; screenwriter, producer, and actor Issa Rae, who first used YouTube and Kickstarter to develop the web series that became her hit HBO show *Insecure*; the Empowerment Plan, a nonprofit organization created by product design student Veronika Scott in Detroit; and start-up companies like Qeyno Group in San Francisco and Juegos Rancheros in Austin that help make tech more accessible to people of color. Forward-thinking and dynamic, *Don't Knock the Hustle* shows the diversity and complexity of a generation on the rise. *UNIQUE APPROACH TO UNDERSTANDING MILLENNIALS* that looks beyond stereotypes about their relationships with tech and labor, based on two years of MacArthur Grant-funded research. *DIVERSE AUDIENCE APPEAL* that will reach millennials, educators, people seeking to hire millennials, and scholars of technology, media, and labor.

Thomas Mann's World Empire, Race, and the Jewish Question

University of Michigan Press Exactly how Thomas Mann's significance registers with the scholarly and general public has been subject to change. For many, Mann retains the aura of the "good German," the Nobel Laureate who was the most vocal leader of the exile community against Hitler and the Third Reich. His diaries, however, contain some rather nasty comments about Mann's many Jewish friends and acquaintances, inspiring a renewed look at the negative Jewish stereotypes in his fiction. The man once venerated as a voice of reason and cosmopolitan tolerance against racist bigotry has been eviscerated as a clandestine anti-Semite. *Thomas Mann's World* is a comprehensive reevaluation of Mann as the representative German author of the *Age of Empire*, placing Mann's comments about Jews and the Jewish characters in his fiction in the larger context of his attentiveness to racial difference, both in the world at large and in himself. Kontje argues that Mann is a worldly author---not in the benign sense that he was an eloquent spokesman for a pan-European cosmopolitanism who had witnessed the evils of nationalism gone mad, although he

was that, too---but in the sense of a writer whose personal prejudices reflected those of the world around him, a writer whose deeply autobiographical fiction expressed not only the concerns of the German nation, as he liked to claim, but also of the world in an era of imperial conquest and global conflict. Todd Kontje is Professor of German and Comparative Literature and Chair of the German Department at the University of California, San Diego.
