magistral treatise approaches the integration of psychology through the study of the multiple causes of normal and dysfunctional behavior. Causality is the focal point reviewed across disciplines. Using diverse models, the book approaches unifying psychology as an ongoing project that integrates genetics, experience, evolution, brain, development, change mechanisms, and so on. The book includes in its integration free will, epitomized as freedom in being. It pinpoints the role of the self in causality and the freedom we have in determining our own behavior. The book deals with disturbed behavior, as well, and tackles the DSM-5 approach to mental disorder and the etiology of psychopathology. Young examines all these topics with a critical eye, and gives many innovative ideas and models that will stimulate thinking on the topic of psychology and causality for decades to come. It is truly integrative and original. Among the topics covered: Models and systems of causality of behavior. Nature and nurture: evolution and complexities. Early adversity, fetal programming, and getting under the skin. Free will in psychotherapy: helping people believe. Causality in psychological injury and law: basics and critics. The American Law of Torts Vicarious Liability in Tort A Comparative Perspective Cambridge University Press Vicarious liability is controversial: a principle of strict liability in an area dominated by fault-based liability. By making an innocent party pay compensation for the

torts of another, it can also appear unjust. Yet it is a principle found in all Western legal systems, be they civil law or common law. Despite uncertainty as to its justifications, it is accepted as necessary. In our modern global economy, we are unlikely to understand its meaning and rationale through study of one legal system alone. Using her considerable experience as a comparative tort lawyer, Paula Giliker examines the principle of vicarious liability (or, to a civil lawyer, liability for the acts of others) in England and Wales, Australia, Canada, France and Germany, and with reference to legal systems in countries such as the United States, New Zealand and Spain. Tort Law Oxford University Press This is an ideal main text for undergraduate tort law courses. The authors combine a lively, engaging writing style with a critical approach to the subject. It uses pedagogical features such as 'counterpoint' and 'pause for reflection' boxes to encourage students to think more deeply. The seventh edition of this classic work explores recent momentous changes in personal injury law and practice and puts them into broad perspective. Most significantly, it examines developments affecting the financing and conduct of personal injury claiming: the abolition of legal aid for most personal injury claims; the increasing use of conditional fee agreements and after-the-event insurance; the meteoric rise and impending regulation of the claims management industry. Complaints that Britain is a 'compensation culture' suffering an 'insurance crisis' are investigated. Restitution Civil Liability for Unjust Enrichment University of Chicago Press Restitution is the body of law concerned with taking away gains that someone has wrongfully obtained. Restitution isn't concerned with rectifying an injury; it's not about losses that one person inflicts on another (those are torts). In some ways restitution is the symmetrical complement to tort law; but despite tort's high profile, its centrality to the popular understanding of what the legal system does the companion doctrine of restitution is much neglected in American scholarship. Ward Farnsworth suggests that this relative neglect is due to restitution's reputation as a hodge-podge of leftover doctrines that don't add up to a clear body of knowledge. He intends to provide a readable and compact book that explains the doctrine of restitution in one place, and show how its components relate to one another. Timing is particularly suitable in the wake of the 2011 publication of the American Law Institute's Restatement Third, Restitution and Unjust Enrichment. Farnsworth's book seeks, in effect, to restate the new Restatement in as concise and lively a fashion as the subject matter will permit, thought with a somewhat different organization and a bit more attention to the theory behind the rules. The book starts with a brief essay on the relationship between restitution and other bodies of law, then proceeds to consider, in a chapter apiece, the four major families of liability in restitution (mistakes; conferrals; takings; and failed trades), the two kinds of remedies available at the end of a case (money and equitable), and finally defenses against claims of unjust enrichment." Fundamental Principles of Law and Economics Routledge

This textbook places the relationship between law and economics in its international context, explaining the fundamentals of this increasingly important area of teaching and research in an accessible and straightforward manner. In presenting the subject, Alan Devlin draws on the neoclassical tradition of economic analysis of law while also showcasing cutting-edge developments, such as the rise of behavioural economic theories of law. Key features of this innovative book include: case law, directives, regulations, and statistics from EU, UK, and US jurisdictions are presented clearly and contextualised for law students, showing how law and economics theory can be understood in practice; succinct end-of-chapter summaries highlight the essential points in each chapter to focus student learning; further reading is provided at the end of each chapter to guide independent research. Making use of tables and diagrams throughout to facilitate understanding, this text provides a comprehensive overview of law-and-economics that is ideal for those new to the subject and for use as a course text for law-and-economics modules.
