<http://www.mheducation.com/highered/platforms/connect/training-support-students.html> Sex Trafficking in South Asia Telling Maya's Story Routledge This book is a critical feminist analysis of sex trafficking. Arguing that trafficking in girls and women is a product of the social construction of gender and other dimensions of power and status within a particular culture and at a particular historical moment, this book offers the necessary locally grounded analysis. Focusing on the case of Nepal, from where 5,000 to 7,000 thousands of Nepali girls and women are trafficked each year primarily to India, Mary Crawford assesses how the social construction of trafficking - the concept and its representation in discourse - are influenced by the dynamics of gender, caste, and the development establishment. The defining figure is an innocent, naïve young girl being lured or duped into leaving the safety of her village. The

trafficking victim is portrayed as "backward"; however, she is "backward" in specific ways that resonate with Nepal's struggle to resist and yet encompass Western influence. This view may lead to paradoxical effects in which efforts to protect girls and women instead restrict their human rights. Rather than seeing women as universalized victims, Crawford assesses how the social construction of trafficking in a particular society affects girls and women who live in that society. In this book, the author's voice as a woman, a feminist, and a social scientist immersed in a "foreign" way of life, illuminates aspects of this process and highlights the subjectivity of urban women. It makes the connection between Nepali subjectivities and a problem of international significance, the trafficking of girls and women. The book provides a model for other locally grounded accounts of sex trafficking to counter the universalizing rhetoric of the mass media and some anti-trafficking activists, filling a niche in South Asian Studies and Women's Studies.

Crossing Borders International Women Students in American Higher Education University Press of America This book explores the processes of self-understanding that take place in a group of Chinese women studying in universities in the United States. In the past few decades, there has been an increasing number of Chinese women attending U.S. universities, yet their psychological experiences within American culture have not been a focus of study by researchers in higher education. Those who crossed geographic, cultural, and psychological borders to study in the U.S. described their change as a basic psychological process called 'reweaving a fragmented self.' This book contributes to the educator's understanding of the diversity of international women's student experiences, expectations, and desires. Talking Difference On Gender and Language SAGE `I love the warmth and wit in this book, but I say this in no way to detract from the seriousness of its subject matter and its incisive treatment by Mary Crawford... this is a great book and an important book which articulates current critical thinking about research around gender and language. Mary Crawford writes brilliantly, powerfully and lucidly... I thoroughly recommend it' - British Psychological Society Psychology of Women Section Newsletter This refreshing re-evaluation of current wisdom - both academic and popular - about men's and women's language critically assesses the abundant social science research of recent years and its representation in the mass media. Exploring a wide range of topics, from talk shows to self-help books, Mary Crawford offers a new understanding of the role of language practices in both maintaining - and disrupting - gender inequality. The book addresses such provocative questions as: Why has the study of gender and language so often focused on the limitations of women's talk? How do academic practices constrain our understanding of how gender relations are re-created and maintained in language use? Why do assertiveness texts usually ignore indirect modes of speech such as humour and storytelling? Transformations Women, Gender & Psychology "Transformations presents a broad, comprehensive theoretical framework for understanding how the lives of all people, but particularly the lives of girls and women, are shaped by gender. Rather than conceiving gender as a collection of individual traits or attributes, this book presents gender as a social system that is used to categorize people and is linked to power and status. The gender system is analyzed throughout the book at three levels: sociocultural, interpersonal, and individual. Because conceptualizing gender as a social system is important from the start, the second chapter of the book is devoted to gender, status, and power. This chapter explains the gender system and how it works at each of the three levels and demonstrates how they are linked"-- Women and Gender A Feminist Psychology McGraw-Hill Humanities, Social Sciences & World Languages This revision of the best-selling text for undergraduate courses offered by departments of Psychology in the Psychology of Women, Sex and Gender, or Sex Roles draws on research from sociology, anthropology, communication, biology, history, and literature. Known for its engaging, never oversimplified style, WOMEN AND GENDER features an integrated thematic organization throughout the book that is synthesized in its final chapter. The authors, well-known, active scholars in the field, take a social constructionist perspective (i.e., gender is a social system of meanings, status, and power, not just a personality characteristic of individuals). The text takes a feminist point of view, advocating basic equality of women and men social, economical, and political while objectively reporting research findings. Information on race, age, class, and sexual orientation, is included and integrated into all text chapters. Four themes are woven throughout the book: Gender is more than just sex; Language and naming are a source of power; Women are a diverse group; and Psychology should be related to social change In the third edition, the short introductory chapter is now immediately followed by the popular chapter about women stereotypes and the harm they do, while the more theoretical chapter on personality has been integrated into other appropriate chapters and linked to current research and issues in the news. More attention is paid to the role of the media in defining girls and women of all ages. The chapter shows how images of women continue to differ from those of men, examines how the media sees women and men world-wide, and looks at the similarities of these depictions cross-culturally. Each chapter now ends with "Connecting Themes," summary of how the book's four themes are played out in the topics of the chapter. Much more material is included in each chapter on the cultural and ethnic diversity of women with added new findings on ethnicity, sexual orientation, gender, social class, women of color, international issues, and women from around the world. In each chapter, a new "Making a Difference" boxed feature spotlights a woman activist who has changed society. A new chapter four on the meanings of difference asks, "How different are men and women really?" and answers this question in terms of contrasting feminist perspectives, presented in the context of concrete social problems. A new concluding chapter 15, "Making a Difference: Toward a Better Future for Women," ties together the four themes of the book and presents an optimistic view of both how the women's movement has changed society and how students can continue to change society positively in response to the women's movement. Other new topics include: analysis of the backlash against feminism (chapter 1); the role of sexism in the schools (chapters 3 and 8); media images of women athletes and the representation of women in rap and music videos (chapter 4); pornography, race, and hostility toward women

(chapters 4 and 14); factors influencing women's perception of their leadership abilities (chapter 5); biological determinism in the media (chapters 3 and 6); the "silencing" of adolescent girls (chapter 8); differences among diverse groups of women in the meaning of sexuality and body image, and implications for therapeutic treatment (chapters 9 and 15); the new reproductive technology and the medical, ethical, and legal issues it raises; woman-headed households; and socially created obstacles to mothering (all in chapter 11); a new synthesis of the costs and benefits of juggling work, family, and relationship roles (chapter 12); changing cultural views of menopause, and achievement in mid- and later life (chapter 13). A companion reader, *In Our Own Words: Readings on the Psychology of Women and Gender*, provides thorough coverage of and commitment to the diversity of the female experience in 45 readings that are brief, Comparative Psychology Evolution and Development of Behavior, 2nd Edition Psychology Press This textbook introduces the student to evolutionary and developmental approaches to the study of animal behavior. It can be used as a core textbook for senior undergraduate and graduate courses in Comparative Psychology, Animal Behavior, and Evolutionary Psychology. This Is How to Get Your Next Job An Inside Look at What Employers Really Want AMACOM "Why didn't you hire the last ten people you interviewed and passed on?" Leading career expert and syndicated columnist Andrea Kay asked numerous employers that single, simple question because of what she felt seemed a glaring disconnect in the business world--millions of educated, qualified people either out of work or unhappily employed, despite an increasing number of companies with job openings they can't seem to fill. How could that be? This Is How to Get Your Next Job is the story of her quest for answers and, more importantly, the surprising conclusions she was led to by these employers frustrated with not being able to fill these positions. The overwhelmingly common answers she received time after time were not about skills or experience but about how applicants behaved and spoke during the interview. From lack of preparation, to pushiness, to a subtly defensive attitude, these simple behaviors that prospective employees exhibited before, during, and after interviews ended up nullifying their otherwise-qualified résumé. Now, in this well-researched book based on candid insights from real-life employers, job hunters can learn how to take control of how they come across to the people in charge of giving them the exciting, rewarding opportunities they are seeking. Show them why you're the perfect fit for their job! Gender Differences in Human Cognition Oxford University Press, USA Mismeasure of Woman Why Women are Not the Better Sex, the Inferior Sex, or the Opposite Sex Simon and Schuster When "man is the measure of all things," woman is forever trying to measure up. In this enlightening book, Carol Tavris unmaskes the widespread but invisible custom -- pervasive in the social sciences, medicine, law, and history -- of treating men as the normal standard, women as abnormal. Tavris expands our vision of normalcy by illuminating the similarities between women and men and showing that the real differences lie not in gender, but in power, resources, and life experiences. Winner of the American Association for Applied and Preventive Psychology's Distinguished Media Contribution Award Mind, Brain, and Drug An Introduction to Psychopharmacology Pearson College Division "Comprehensive yet manageable, Mind, Brain, and Drug: An Introduction to Psychopharmacology serves as an excellent guide for students to this increasingly important field." -Jacket. Mansfield Park Large Print About thirty years ago Miss Maria Ward, of Huntingdon, with only seven thousand pounds, had the good luck to captivate Sir Thomas Bertram, of Mansfield Park, in the county of Northampton, and to be thereby raised to the rank of a baronet's lady, with all the comforts and consequences of an handsome house and large income. All Huntingdon exclaimed on the greatness of the match, and her uncle, the lawyer, himself, allowed her to be at least three thousand pounds short of any equitable claim to it. She had two sisters to be benefited by her elevation; and such of their acquaintance as thought Miss Ward and Miss Frances quite as handsome as Miss Maria, did not scruple to predict their marrying with almost equal advantage. But there certainly are not so many men of large fortune in the world as there are pretty women to deserve them. Miss Ward, at the end of half a dozen years, found herself obliged to be attached to the Rev. Mr. Norris, a friend of her brother-in-law, with scarcely any private fortune, and Miss Frances fared yet worse. Miss Ward's match, indeed, when it came to the point, was not contemptible: Sir Thomas being happily able to give his friend an income in the living of Mansfield; and Mr. and Mrs. Norris began their career of conjugal felicity with very little less than a thousand a year. But Miss Frances married, in the common phrase, to disoblige her family, and by fixing on a lieutenant of marines, without education, fortune, or connexions, did it very thoroughly. Emotion and Gender Constructing Meaning from Memory Sage Publications (CA) Taking a new approach to the study of emotions, this book presents a rigorous analysis of the gendered ways in which people construct their emotions within society. Extensive use of chapter objectives, key point and end-of-chapter summaries, practice problems, applied scenarios, internet-based resources, and statistics skills review enable students to engage more fully with the material for a deeper understanding. Written in a clear, reader-friendly style, the text approaches challenging topics by balancing technical rigor with relatable examples of contemporary applications. Representations Social Constructions of Gender Routledge Developed from an edited series of journal articles into a larger collection with a clear identity and emphasis all its own-one need only browse through the Table of Contents. "The divided lives of women in literature ," "Case studies of agency and communion in women's lives," "A sense of humor," "Dialogue with Guatemalan Indian women," "Coping with rape," "Earliest memories: Sex differences and the meaning of experience," "Women's explanations for job changes," "Androgyny and the life cycle: The Bacchae of Euripides" -these are but a few of the topics represented in this diverse and interesting collection. What, then, binds these essays together? First and foremost, this is a book of stories about women, about the conflicts, choices, and

opportunities that are present in the lives of women, both real and imagined. **The Body Project An Intimate History of American Girls Vintage** A hundred years ago, women were lacing themselves into corsets and teaching their daughters to do the same. The ideal of the day, however, was inner beauty: a focus on good deeds and a pure heart. Today American women have more social choices and personal freedom than ever before. But fifty-three percent of our girls are dissatisfied with their bodies by the age of thirteen, and many begin a pattern of weight obsession and dieting as early as eight or nine. **Why? In The Body Project**, historian Joan Jacobs Brumberg answers this question, drawing on diary excerpts and media images from 1830 to the present. Tracing girls' attitudes toward topics ranging from breast size and menstruation to hair, clothing, and cosmetics, she exposes the shift from the Victorian concern with character to our modern focus on outward appearance—in particular, the desire to be model-thin and sexy. Compassionate, insightful, and gracefully written, **The Body Project** explores the gains and losses adolescent girls have inherited since they shed the corset and the ideal of virginity for a new world of sexual freedom and consumerism—a world in which the body is their primary project. **Handbook of the Psychology of Women and Gender John Wiley & Sons** A lively, thought-provoking exploration of the latest theory and practice in the psychology of women and gender Edited by Rhoda Unger, a pioneer in feminist psychology, this handbook provides an extraordinarily balanced, in-depth treatment of major contemporary theories, trends, and advances in the field of women and gender. Bringing together contributions from leading U.S. and international scholars, it presents integrated coverage of a variety of approaches—ranging from traditional experiments to postmodern analyses. Conceptual models discussed include those that look within the individual, between individuals and groups, and beyond the person-to the social-structural frameworks in which people are embedded as well as biological and evolutionary perspectives. Multicultural and cross-cultural issues are emphasized throughout, including key variables such as sexual orientation, race/ethnicity, and social class. Researchers and clinicians alike will appreciate the thorough review of the latest thinking about gender and its impact on physical and mental health—which includes the emerging trends in feminist therapy and sociocultural issues important in the treatment of women of color. In addressing developmental issues, the book offers thought-provoking discussions of new research into possible biological influences on gender-specific behaviors; the role of early conditioning by parents, school, and the media; the role of mother and mothering; gender in old age; and more. Power and gender, as well as the latest research findings on American men's ambivalence toward women, sexual harassment, and violence against women, are among the timely topics explored in viewing gender as a systemic phenomenon. **Handbook of the Psychology of Women and Gender** is must reading for mental health researchers and practitioners, as well as scholars in a variety of disciplines who want to stay current with the latest psychological/psychosocial thinking on women and gender. **Body Politics Power, Sex, and Nonverbal Communication Prentice Hall** A feminist analysis of body language as a major means of nonverbal communication used by persons in power, primarily men, to maintain a social hierarchy **Gender and Sexual Identity Transcending Feminist and Queer Theory Springer Science & Business Media** The first comprehensive presentation of an explicitly transgender theory. This theory goes beyond feminist and queer theory by incorporating the idea of fluid embodiment and lived experience in conceptualizing gender and sexual identity. Beyond developing a formulation of transgender theory that incorporates the socially constructed, embodied, and self-constructed aspects of identity in the narrative of lived experiences, the authors discuss the implications of this “trans-identity theory” for theory, research, and practice. **Cognitive Psychology In and Out of the Laboratory SAGE** **Communicating Gender Diversity A Critical Approach SAGE** The purpose behind **Communicating Gender Diversity: A Critical Approach** is not to provide any final conclusions about communicating gender. Because gender is a constantly evolving concept, both in terms of individuals' gender identity development and the larger culture's predominant notions of gender, such absolute claims are not possible. Instead, the intent is to better equip readers with tools with which they can examine, and make sense of, the intersections of communication and gender. The text covers the variety of ways in which communication of and about gender and sex enables and constrains people's intersectional identities. The authors believe people are social actors and, as such, create meaning through their symbolic interactions. Thus, the book's emphasis is not on how gender influences communication, but on how communication constitutes gender. They also believe that people are capable of being self-reflective about communication processes, and creative in generating new ways to play with symbols. **Gender, Language and Discourse Routledge** Is language sexist? Do women and men speak different languages? **Gender, Language and Discourse** uniquely examines the contribution that psychological research - in particular, discursive psychology - has made to answering these questions. Until now, books on gender and language have tended to be from the sociolinguistic perspective and have focused on one of two issues - sexism in language or gender differences in speech. This book considers both issues and develops the idea that they shouldn't be viewed as mutually exclusive endeavours but rather as part of the same process - the social construction of gender. Ann Weatherall highlights the fresh insights that a social constructionist approach has made to these debates, and presents recent theoretical developments and empirical work in discursive psychology relevant to gender and language. **Gender, Language and Discourse** provides the most comprehensive and up-to-date discussion of the gender and language field from a psychological perspective. It will be invaluable to students and researchers in social psychology, cultural studies, education, linguistic anthropology and women's studies. **South Pacific Paradise Rewritten Oxford University Press** Rodgers and Hammerstein's Tony and Pulitzer Prize-winning musical "South Pacific" has remained a mainstay of the American musical theater since it opened in 1949, and its powerful message about racial intolerance continues to resonate with twenty-first century audiences. Drawing on extensive research in the Rodgers and the Hammerstein papers, including Hammerstein's personal notes on James A. Michener's *Tales of the South Pacific*, Jim Lovensheimer offers a fascinating reading of "South Pacific" that explores the show's complex messages and demonstrates how the presentation of those messages changed throughout the creative process. Indeed, the author shows how Rodgers and especially Hammerstein continually refined and softened the theme of racial intolerance until it was more acceptable to mainstream Broadway audiences. Likewise, Lovensheimer

describes the treatment of gender and colonialism in the musical, tracing how it both reflected and challenged early Cold War Era American norms. The book also offers valuable background to the writing of "South Pacific," exploring the earlier careers of both Rodgers and Hammerstein, showing how they frequently explored serious social issues in their other works, and discussing their involvement in the political movements of their day, such as Hammerstein's founding membership in the Hollywood Anti-Nazi League. Finally, the book features many wonderful appendices, including two that compare the original draft and final form of the classic songs "I'm Gonna Wash That Man Right Out-a My Hair" and "I'm In Love With a Wonderful Guy." Thoroughly researched and compellingly written, this superb book offers a rich, intriguing portrait of a Broadway masterpiece and the era in which it was created.

Why Horror Seduces Oxford University Press Why do humans feel the need to scream at horror films? In *Why Horror Seduces*, author Matthias Clasen looks to evolutionary social science to show how the horror genre is a product of human nature.

Nobody's Girl Friday The Women Who Ran Hollywood Oxford University Press "Disillusioned with what the American film industry had become by the 1970s, Bette Davis remembered a time when "women owned Hollywood." This book is their story.

Historian J.E. Smyth challenges the belief, reinforced in too many histories and public comments, that feminism died between 1930 and 1950, that women were not important within the Hollywood studio system, that male directors called all the shots, and that the most important Hollywood writer you should know about is Dalton Trumbo"--

Critical Studies of Gender Equalities Nordic Dislocations, Dilemmas and Contradictions There is an increasing awareness that gender equality is not something that just "is" in unproblematic and natural ways, but that it may be understood and packaged in several ways, with quite different consequences. It therefore makes good sense to ask, with the authors in this book, how gender equality is understood and practised in the Nordic countries, with their avowedly good record on gender equality measures. It makes especially good sense to look closely at the consequences and difficulties that arise out of the many-faceted meanings attached to "gender" and "equality" in politics and policies, as well as in daily life. In this book, eleven Nordic scholars offer critical analyses of current dislocations, dilemmas and contradictions in the field of Nordic gender equality. They have studied issues to do with constructing state and nation, regulating political practices and producing gendered subjectivities. The authors are affiliated with universities in Denmark, Finland, Norway and Sweden and united in seeing the need for a critical scholarly stance on Nordic gender equality policies and practices.

Statistical Methods for Psychology Cengage Learning STATISTICAL METHODS FOR PSYCHOLOGY surveys the statistical techniques commonly used in the behavioral and social sciences, particularly psychology and education. To help students gain a better understanding of the specific statistical hypothesis tests that are covered throughout the text, author David Howell emphasizes conceptual understanding. This Eighth Edition continues to focus students on two key themes that are the cornerstones of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics--reflecting the evolving realm of statistical methods--include effect size, meta-analysis, and treatment of missing data. Gender and Thought Psychological Perspectives In this volume, gender serves as a general framework for analyzing the ways people think about mathematical performance, language, self-concept, social categories, and methods and ways of knowing and creating knowledge. A distinguished group of authors shows how various forces in language, family practices, and education reinforce differentiation among the sex roles. This volume attempts to bridge this gap between difference and equality by revitalizing and reinterpreting the concept of gender differences.

Gender and Thought places research on women and gender at the heart of many important areas of scholarly inquiry.

Lectures on

the Psychology of Women Fourth Edition Waveland Press Designed as a supplement in courses on the psychology of women, the psychology of gender, and gender-role development, this collection of short, accessible lectures, written by experienced and committed teachers, spotlights topics that often receive less in-depth coverage in core textbooks. While topically arranged to align with standard texts, each favorite lecture stands alone: essentially instructors can assign the readings to meet their own course needs. Among the student-friendly features are the informal writing styles, with each author speaking directly to the reader; questions and ideas that encourage critical thinking; and biographical statements and photographs that introduce each contributor. The authors represent a variety of personal backgrounds and experiences, but they believe in the importance of gender equality. To that point, the book addresses common feminist themes, including the social construction of gender, power, the value of diversity, inclusive language, the global status of women, and the value of social activism. **Arts Based Research SAGE Publications** Designed to be used as both a class text and a resource for researchers and practitioners, Arts Based Research provides a framework for those who seek to broaden the domain of qualitative inquiry in the social sciences by incorporating the arts as forms that represent human knowing.
