The book is structured in three parts. Part I starts with the motivation for the work and introduces the general structure of the book. Next, chapter 2 provides a brief introduction to main BPM concepts including the business process lifecycle, which describes the analysis of an organization by means of modeling and simulation, business process performance indicators, and the

automatic extraction of information from event data. Chapter 3 then offers a summary of the concept of agent and the studies concerning agent-based approaches that involve business process analysis and management studies. Part II of the book introduces in chapter 4 the NetLogo tool adopted throughout the remaining book. After that, chapter 5 focuses on agent-oriented modeling as a problem domain analysis and design approach for creating decision-support systems based on agent-based simulations. Chapter 6 further describes the topic of agent-based modeling and simulation for business process analysis. The final part III starts with chapter 7 that reviews some BPM applications by introducing programs enabling to manage models represented in standard formats, such as BPMN, Petri nets, and the eXtensible Event Stream standard language. Subsequently, chapter 8 describes a number of case studies from different areas, and eventually, chapter 9 introduces some examples of advanced topics of process mining and agent-based simulation with process discovery, conformance checking, and agent-based applications utilizing Petri nets. The book is primarily written for researchers and advanced graduate and PhD students who look for an introduction to the fruitful exploitation of agent-based modeling to business process management. The book is also useful for industry practitioners who are interested in supporting their business decisions with computational simulations. The book is complemented by a dedicated web site with lots of additional details and models in NetLogo for further evaluation by the reader.

**Research Anthology on Facilitating New Educational Practices Through Communities of Learning** [IGI Global](#) With the future of education being disrupted and the onset of day-to-day uncertainties and challenges that have to be solved quickly, teachers are now turning to professional development communities/support communities where they can share and learn about effective practices to use in the classroom. While transitioning to blended or online learning and keeping up with the technological advances in education, these communities provide an essential backbone for teachers to rely on for support and updated knowledge on what educational practices are being utilized, how they are working, and what solutions have been found for the ever-changing climate of education. Research on the benefits and use of these communities, as well as on the latest educational practices, is essential in teacher development and student learning in the current culture of a rapidly changing educational environment. The Research Anthology on Facilitating New Educational Practices Through Communities of Learning contains hand-selected, previously published research that provides information on the communities of learning that teachers are currently involved in to seek the latest educational practices. The chapters cover the context of these communities, the benefits, and an overview of how this support is a necessary tool in today's practices of teaching and learning. While highlighting topics such as learning communities, teacher development, mentoring, and virtual communities, this book is essential for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students who are interested in how communities of practice tie into professional development, teacher learning, and the online shift in teaching.
