This book explores technological considerations of small-scale, primitive fishing technologies, and describes innovative, relatively inexpensive methods and tools that have already been successfully applied in developing countries. It offers practical information about all aspects of small-scale fishing, including boat design and construction, fishing methods and gear, artificial reef construction and fish aggregating devices, techniques for coastal mariculture, and simple methods for processing and preserving fish once they are caught. **Fisheries Technologies for Developing Countries** is illustrated throughout with photographs of the devices and construction methods described in the text. **Mariner 2-220 HP OB 1976-1989** [Haynes Manuals N.
